Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the consolidated annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the consolidated annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the consolidated annual financial statements and was given unrestricted access to all financial records and related data.

The consolidated annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board and as required by the MFMA.

The consolidated annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that she is ultimately responsible for the system of internal financial control established by the group and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the group and all employees are required to maintain the highest ethical standards in ensuring the group's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the group is on identifying, assessing, managing and monitoring all known forms of risk across the group. While operating risk cannot be fully eliminated, the group endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the consolidated annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the group's cash flow forecast for the year to 30 June 2021 and, in the light of this review and the current financial position, she is satisfied that the group has or has access to adequate resources to continue in operational existence for the foreseeable future.

The municipality is wholly dependent on the municipality genarating sufficient revenue for continued funding of operations. The consolidated annual financial statements are prepared on the basis that the municipality is a going concern and that the municipality has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

Although the accounting officer are primarily responsible for the financial affairs of the group, they are supported by the group's external auditors.

The consolidated annual financial statements set out on page 7 - 209 which have been prepared on the going concern basis, were approved by the accounting officer on 30 November 2020 and were signed on its behalf by:

| Mmaseabata Mutlaneng | Umar Banda CA(SA) |

Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the consolidated annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the consolidated annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the consolidated annual financial statements and was given unrestricted access to all financial records and related data.

The consolidated annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board and as required by the MFMA.

The consolidated annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that she is ultimately responsible for the system of internal financial control established by the group and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the group and all employees are required to maintain the highest ethical standards in ensuring the group's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the group is on identifying, assessing, managing and monitoring all known forms of risk across the group. While operating risk cannot be fully eliminated, the group endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the consolidated annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the group's cash flow forecast for the year to 30 June 2021 and, in the light of this review and the current financial position, she is satisfied that the group has or has access to adequate resources to continue in operational existence for the foreseeable future.

The municipality is wholly dependent on the municipality generating sufficient revenue for continued funding of operations. The consolidated annual financial statements are prepared on the basis that the municipality is a going concern and that the municipality has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

Although the accounting officer are primarily responsible for the financial affairs of the group, they are supported by the group's external auditors.

The consolidated annual financial statements set out on page 7 - 209 which have been prepared on the going concern basis, were approved by

the accounting officer on 30 November 2020 and were signed on its behalf by:

Mmaseabata Mutlaneng (Acting) City Manager

The explanations for major variances between the budget and the actual for the period under review are done in Note 70.

The explanations for changes between the original budget and the final budget for the period under review are done in Note 70.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1. Basis of preparation of annual financial statements

The consolidated annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003). The accounting framework as prescribed is determined in Directive 5 issued by the Accounting Standards Board.

These consolidated annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise.

Assets, liabilities, revenues and expenses were not offset, except where offsetting is either required or permitted by a Standard of GRAP.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these consolidated annual financial statements, is disclosed below. Certain accounting policies are supported by reasonable and prudent judgements and estimates.

1.1 Presentation currency

These consolidated annual financial statements are presented in South African Rand, which is the functional currency of the economic entity and amounts have been rounded to the nearest Rand.

1.2 Going concern assumption

These consolidated annual financial statements have been prepared based on the expectation that the group will continue to operate as a going concern for at least the next 12 months. Refer to Note 60. The basis presumes that funds will be available for future operations and that the realisation of assets and settlement of liabilities, contingent liabilities and commitments will occur in the ordinary course of business.

1.3 Transfer of functions between entities under common control

Assets acquired/[transferred] and liabilities assumed [relinquished]

The recognition of assets and liabilities is subject to the following conditions:

The assets acquired and the liabilities assumed are part of what had been agreed in terms of the binding arrangement (if applicable), rather than the result of separate transactions.

Other criteria for the entity (as acquirer)

The assets acquired and liabilities assumed that qualify for recognition as set out in the binding arrangement meet the definitions of assets and liabilities in the Framework for the Preparation and Presentation of Financial Statements and the recognition criteria in the applicable Standards of GRAP at the transfer date.

Costs that the economic entity expects, but which it is not obliged to incur in the future to effect its plan to exit an activity of the transferor or to terminate the employment of, or relocate the transferor's employees, are not accounted for as part of the liabilities at the transfer date. The economic entity does not recognise those costs as part of a transfer of functions. Instead, the economic entity recognises these costs in its consolidated annual financial statements after the transfer has occurred, in accordance with the applicable Standards of GRAP.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.3 Transfer of functions between entities under common control (continued)

Accounting by the entity as acquirer

Initial recognition and measurement

As of the transfer date, the economic entity recognises the purchase consideration paid to the transferor and all the assets acquired and liabilities assumed in a transfer of functions. The assets acquired and liabilities assumed are measured at their carrying amounts.

The difference between the carrying amounts of the assets acquired, the liabilities assumed and the consideration paid to the transferor is recognised in accumulated surplus or deficit.

Acquisition-related costs

The group accounts for acquisition-related costs as expenses in the period in which the costs are incurred and the services are received, with the exception of the costs incurred to issue debt or equity securities, which are recognised in accordance with the Standard of GRAP on Financial Instruments.

Subsequent measurement

The economic entity subsequently measures any assets acquired and any liabilities assumed in a transfer of functions in accordance with the applicable Standards of GRAP.

At the transfer date, the economic entity classifies or designates the assets acquired and liabilities assumed as necessary to apply other Standards of GRAP subsequently. The economic entity makes those classifications or designations on the basis of the terms of the binding arrangement, economic conditions, its operating or accounting policies and other relevant conditions that exist at the transfer date. An exception is that the economic entity classifies the following contracts on the basis of the contractual terms and other factors at the inception of the contract (or, if the terms of the contract have been modified in a manner that would change its classification, at the date of that modification, which might be the transfer date):

- classification of a lease contract as either an operating lease or a finance lease in accordance with the Standard of GRAP on Leases; and
- classification of a contract as an insurance contract in accordance with the International Financial Reporting Standard on Insurance Contracts.

1.4 Significant judgements and sources of estimation uncertainty

The preparation of these consolidated annual financial statements in conformity with GRAP requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the group's accounting policies. The areas involving a higher degree of judgement or complexity or areas where assumptions and estimates are significant to the financial statements are disclosed in the notes to the financial statements, where applicable.

Receivables /Investments and/or loans

The group assesses its trade receivables, investments and loans and receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, judgements have to be made as to whether there were observable data indicating a measurable decrease in the estimated future cash flows from a financial asset. The impairment is measured at the reporting date taking into account the different classes of debtors and the history of payment success of debtors.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.4 Significant judgements and sources of estimation uncertainty (continued)

Impairment of consumer receivables, long-term receivables and other receivables

The group assesses its consumer debtors, other receivables and long-term receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, judgements have to be made as to whether there were observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The group has developed a detailed impairment model used for assessing whether there is objective evidence that consumer receivables, housing receivables and long-term receivables should be impaired. The impairment model is in line with the requirements of GRAP 104, as it categorises debtors into similar credit risk characteristics and assesses them for impairment.

The group employed the services of a professional actuary to calculate the present value of the future cash flows of the receivables discounted at the receivables' original effective rate. The Projected Unit Credit discounted cash flow method was used in calculating the present value of the future cash flows. Prior payment patterns were considered to calculate the probability of debt being repaid in future periods, with the necessary adjustments. In determining these assumptions, it was assumed the payments per account in the payment data provided were first allocated to the oldest debt incorporated. A discount rate assumption of 10,25% to discount future cash flows to 30 June 2020 was used.

Probability to debt

The ultimate impact of COVID-19 on the economy and debt collections is highly uncertain with an anticipated decrease in the of City of Tshwane's debt repayments and ultimate increase in impairments. The City has partly implicitly allowed for this impact by updating and calculating the repayment probabilities considering payments made during the pandemic. This however is expected to only partially allow for the long-term impact of COVID-19. The City has therefore shown the potential impact of the pandemic by considering more severe assumptions. Prior payment patterns are used to calculate the probability of debt being repaid in future periods, with the necessary adjustments. We have weighted the probabilities more to payments for the year ended 30 June 2020 than previous years. This implicitly allows for the lower payments as a result of COVID-19, which occurred from April to June 2020. It was assumed that the payments per account in the payment data provided were first allocated to the oldest debt incorporated in the age analyses provided. In order to project the impact of COVID-19, we have adjusted the repayment probabilities per risk category after considering prior payment patterns before and during the pandemic in order to foresee the future within each category.

Allowance for slow-moving, damaged and obsolete stock

An allowance is made for stock to be written down to the lower of cost or net realisable value. Management has made estimates of the selling price and direct cost to sell on certain inventory items. In cases of inventories held for distribution through a non-exchange transaction or held for consumption in the production process of goods to be distributed at no charge or for a nominal charge, the write-down is the lower of cost and current replacement cost. The write down is included in the operational surplus (general expense). Refer to Note 3.

Fair value estimation

The fair value of financial instruments traded in active markets is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the group is the current bid price.

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. The group uses a variety of methods and makes assumptions that are based on market conditions existing at the end of each reporting period. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows.

Impairment of non-cash-generating assets

The group assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the Municipality then estimates the recoverable service amount of the non-cash-generating asset. The recoverable service amount of non-cash-generating assets has been determined on the higher of value-in-use calculations and fair value less cost to sell. These calculations require the use of estimates and assumptions.

The excess of the carrying amounts over the recoverable service amount is recognised as impairment loss in the statement of financial performance.

Provisions

Management's judgement is required when recognising and measuring provisions as well as contingent liabilities and contingent assets. Provisions are raised based on the information available to management, and past knowledge. A provision is recognised when the Municipality has a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation, and the amount of the obligation can be reliably estimated. Provisions are measured at management's best estimate of the expenditure required to settle the obligation at the reporting date, and are discounted to present value where the effect is material.

Summary of significant accounting policies

1.4 Significant judgements and sources of estimation uncertainty (continued)

The estimates are discounted at a discount rate that reflects current market assessments of the time value of money. Additional disclosure of these estimates of provisions is included in Note 22 - Provisions.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.4 Significant judgements and sources of estimation uncertainty (continued)

Useful lives of Assets (property, plant and equipment ,investment and intangible assets)

The group's management determines the estimated useful lives and related depreciation charges and amortisation charge for assets. This estimate is based on industry norms. The industry norm is adjusted for entity-specific considerations. Management will increase the depreciation charge where useful lives are less than previously estimated useful lives.

Post-retirement benefits

The present value of the post-retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post-retirement obligations.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 21.

Effective interest rate

The group uses the weighted average cost of capital (WACC) to discount future cash flows in the calculation of provisions (refer to Note 22.)

The group has certain borrowings which are linked to the Jibar rate which fluctuated from 6,15% to 8,733% for the year under review. Refer to Note 19.

Budget information

The group deems a 10% deviation on operational revenue and expenditure and a 5% or more for capital expenditure between budget and actual amounts to be material. These percentages are based on management's estimate and is considered to be appropriate. All material differences are explained in the notes to the consolidated annual financial statements.

1.5 Biological assets (game) - disclosed under property, plant and equipment

Biological assets (game) - disclosed under property, plant and equipment - are measured at their fair value less point-of-sale costs. These animals do not form part of agricultural activity and are therefore classified as part of Property, plant and Equipment in terms of GRAP 17 and not GRAP 27. In terms of paragraph 42 of GRAP 17 a class of property, plant and equipment is a grouping of assets of a similar nature or function in an entity's operations. This class of property, plant and equipment is however not measured at cost as the rest of the assets under property, plant and equipment, but are measured at fair value.

The fair value of livestock is determined based on market prices of livestock of similar age, breed and genetic merit.

A gain or loss arising on initial recognition of biological assets that form part of an agricultural activity - is included as a surplus or deficit for the period in which it arises.

Biological assets (game) are derecognised when the group disposes thereof or when it is no longer probable that future economic benefits or service potential will be generated from the biological asset game). Any gain or loss that arises at the point of derecognition is recognised in surplus or deficit at the point of derecognition.

1.6 Investment property

Investment property is recognised as an asset when it is probable that the future economic benefits or service potential that is associated with the investment property will flow to the economic entity, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or to service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Land held for a currently undetermined future use is recognised as investment property.

The gain or loss on the disposal or retirement of investment property is determined as the difference between the sales proceeds and the carrying value of the asset on the date of disposal and is recognised in the surplus or deficit for the year.

In terms of GRAP 16: Investment property, all useful lives of investment properties are reviewed annually on an indicator basis.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.6 Investment property (continued)

Investment property is carried at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is provided to write down the cost, less estimated residual value by equal instalments over the useful life of the property, which is as follows:

ItemUseful life (years)Property - landIndefinite

Property - buildings 6 - 50

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential is expected from its disposal.

Transfers are made to or from investment property only when there is a change in use. For a transfer from investment property to owner- occupied property (property, plant and equipment), the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner-occupied property becomes an investment property, the entity accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

The economic entity separately discloses expenditure to repair and maintain investment property in the notes to the consolidated annual financial statements (see Note 11).

The economic entity discloses relevant information relating to assets under construction or development in the notes to the consolidated annual financial statements (see Note 11).

1.7 Property, plant and equipment

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the economic entity; and
- the cost of the item can be measured reliably.

Property, plant and equipment are initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Items such as spare parts, standby equipment and servicing equipment are recognised when they meet the definition of property, plant and equipment.

Major inspection costs which are a condition of the continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.7 Property, plant and equipment (continued)

Compensation from third parties for an item of property, plant and equipment that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

Depreciation is calculated at cost, using the straight-line method over the estimated useful lives of the assets. The residual value, depreciation method and useful life, if not significant, are reassessed annually on an indicator basis with the effect of any changes in estimate accounted for on a prospective basis. The depreciation rates are based on the following estimated useful lives:

| Asset category | Depreciation method | Useful life (years) | |
|-------------------------------------|---------------------|---------------------|--|
| and | Not depreciated | Indefinite | |
| nfrastructure | Straight line | | |
| Roads and storm water | | 4 - 60 | |
| Electricity | | 5 - 65 | |
| Water | | 4 - 100 | |
| Sewer | | 1 - 100 | |
| Solid waste | | 9 - 17 | |
| Network and telecommunication | | 2 -37 | |
| Waste water purification works | | 4 - 100 | |
| Security | | 1 -41 | |
| Airport | | 5 - 56 | |
| Community | Straight line | | |
| Buildings | - | 2 - 60 | |
| Recreational facilities | | 4 - 51 | |

| Other property, plant and equipment | Straight line | | |
| Furniture and fittings | - | 1 - 41 | |
| Water craft | | 2 - 16 | |
| Office equipment | | 1 - 41 | |
| Plant and equipment | | 1 - 41 | |
| Buildings | | 1 - 61 | |
| Specialised vehicles | | 1 - 46 | |
| Other vehicles | | 1 - 106 | |
| Computer equipment | | 1 - 45 | |
| Livestock | | 7 - 16 | |
| Other equipment | | 1 - 42 | |
| Books | | 3 - 16 | |
| lousing | Straight line | | |
| Housing | · · | 15 - 91 | |
| ervice concession | Straight line | | |
| Building (Tshwane House) | - | 25 | |
| _eased assets | Straight line | | |
| Vehicles, equipment, etc | - | 3 - 20 | |

The Data Dictionary contained in the Asset Management Policy contains the details of the components and their specific useful life estimates.

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

The residual value and the useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Reviewing the useful life of an asset on an annual basis does not require the group to amend the previous estimate unless expectations differ from the previous estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential is expected to be consumed by the economic entity. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.7 Property, plant and equipment (continued)

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the economic entity holds for rentals to others and subsequently routinely sells as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available for sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

The economic entity separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the financial statements (see Note 10).

The economic entity discloses relevant information relating to assets under construction or development in the notes to the financial statements (see Note 10).

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits or service potential over the total life of the asset in excess of the most recently assessed standard of performance of the existing asset will flow to the group. All other repairs and maintenance are charged to surplus or deficit for the year in which they are incurred.

The group tests for impairment where there is an indication that an asset might be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an item of property, plant and equipment is greater than the estimated recoverable amount (or recoverable service amount) it is written down immediately to its recoverable amount (or recoverable service amount) and an impairment loss is charged to surplus or deficit for the year.

Incomplete construction work is stated at historical cost. Depreciation only commences when the asset is ready for use.

1.8 Site rehabilitation and restoration cost

The municipality has an obligation to rehabilitate and restore items of property, plant and equipment. Such obligations are referred to as "rehabilitation provisions". The cost of an item of property, plant and equipment includes the initial estimate of the costs of rehabilitation and restoration of the site on which it is located, the obligation for which the municipality incurs such costs either when the item is acquired or as a consequence of having used the item during a particular period.

As the related asset is measured using the cost model:-

- (a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- (b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- (c) if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets.

1.9 Intangible assets

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that is attributable to the asset will flow to the economic entity; and
- the cost or fair value of the asset can be measured reliably.

Intangible assets are carried at cost less accumulated amortisation and any impairment losses. Software is amortised on a straight-line basis over its anticipated useful life. Generally, costs associated with developing computer software programs are recognised as an expense as incurred. However, costs that are clearly associated with an identifiable and unique product, which will be controlled by the group and have a probable benefit exceeding the cost beyond one year, are recognised as an intangible asset.

Expenditure which enhances and extends the benefits of computer software programs beyond the original life of the software is capitalised. Computer software development costs recognised as assets are amortised using the straight-line method over their useful lives. Costs associated with the maintenance of existing computer software programs are expensed as incurred.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.9 Intangible assets (continued)

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale;
- there is an intention to complete and use or sell it;
- there is an ability to use or sell it;
- it will generate probable future economic benefits or service potential;
- there are available technical, financial and other resources to complete the development and to use or sell the asset; and
- the expenditure attributable to the asset during its development can be measured reliably.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight-line basis over their useful life.

In terms of GRAP 31: Intangibles, all useful lives of intangible assets are reviewed annually on an indicator basis.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Amortisation is provided for to write down the intangible assets, on a straight-line basis, to their residual values as follows:

ItemUseful lifeComputer software, other3 - 30 yearsServitudesindefinate

Servitudes when registered do not expire after a period of time. There is no time condition coupled to it, therefore the indefinite useful life.

The economic entity discloses relevant information relating to assets under construction or development (if applicable) in the notes to the financial statements (see Note 12).

The economic entity discloses relevant information relating to the repair and maintenance of intangible assets in the notes to the financial statements (see Note 12).

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential is expected from its use or disposal.

The gain or loss (difference between the net disposal proceeds and the carrying amount) arising from the derecognition of an intangible asset is included in surplus or deficit when the asset is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

1.10 Internal reserves

Self-insurance reserve

A self-insurance reserve was established and, subject to external insurance where deemed necessary, covers claims that might occur. Premiums are charged to the respective services, taking into account the claims history and replacement value of the insured assets.

Contributions to and from the reserve are transferred via the statement of changes in net assets to the reserve in line with the amount provided for in the operating budget.

- The total amount of insurance premiums paid to external insurers is regarded as an expense and must be shown as such in surplus or deficit for the year. These premiums do not affect the self-insurance reserve.
- Claims received from external insurers are utilised in the calculation of a profit or loss on the scrapping of damaged assets and
 are therefore effectively recorded in surplus or deficit for the year.
- Claims received to meet repairs of damages on assets are reflected as income in surplus or deficit for the year.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.10 Internal reserves (continued)

The self-insurance reserve is based on recognised insurance industry principles. To determine the level of capacity required, an agreed methodology has been adopted. The calculation of the required capacity of the self-insurance reserve is consistently applied annually based on the following methodology:

- Determination of the forecast surplus (free) capacity within the self-insurance reserve.
- The following liabilities are taken into account in determining this surplus capacity:
 Reported known outstanding claims and statistically forecast losses for the remainder of the underwriting period (IBNR = claims incurred but not yet reported).
- Probability and quantification of a catastrophic loss.
- Comparison of the surplus (free) capacity to the declared value of the highest service delivery asset to determine the shortfall
 that exists based on the assumption that sufficient capacity will be built up to cover that asset through the Self-insurance
 reserve over an agreed period of time.
- Spread the shortfall over a five-year period (in terms of the Long-term Insurance Strategy).
- Adjust for inflation with the agreed relevant indices.
- Determine the annual premium contribution to reach the target capacity over a five-year period.
- Apply a probability and affordability factor to the ideal premium contribution to determine the budgeted premium contribution over a five-year period.

Compensation for occupational injuries and diseases (COID) reserve

The Municipality has been exempted from making contributions to the Compensation Commissioner for Occupational Injuries and Diseases (COID). In terms of this exemption the Municipality established a COID reserve to offset claims from employees. Amounts are transferred to the COID reserve from the accumulated surplus based on the statutory rate of contributions set out in the Compensation for Occupational Injuries and Diseases Act, 1993 (Act 130 of 1993) as well as additional amounts deemed necessary to ensure that the balance of the reserve is adequate to offset potential claims.

Contributions to the COID reserve are based on 1% of the annual remuneration of employees that qualify for COID benefits. All employees earning more than a predetermined amount per annum are reinsured by what is called a "COID wrap-around" policy. Claims are paid as determined by the Compensation Commissioner and are reflected in surplus or deficit for the year. Claims are settled by transferring a corresponding amount from the COID reserve to the accumulated surplus in the statement of changes in net assets.

The Compensation Commissioner required a ceded investment or guarantee. This amount is calculated annually by the Department of Labour. The Municipality opted to supply the Compensation Commissioner with a bank guarantee.

1.11 Housing development fund

Sections 15(5) and 16 of the Housing Act, 1997 (Act 107 of 1997), which came into operation on 1 April 1998, require that the Municipality maintain a separate housing operating account. This legislated separate operating account will be known as the Housing Development Fund. The Housing Act also requires in terms of Section 14(4)(d)(iii)(aa) read with, inter alia, Section 16(2) that the net proceeds of any letting, sale of property or alienation, financed previously from government housing funds, be paid into a separate operating account and be utilised by the Municipality for housing development, subject to the approval of the MEC responsible for housing. Loans from national and provincial government that were used to finance housing selling schemes were extinguished on 1 April 1998 and transferred to the Housing Development Fund. The following provisions are set for the creation and utilisation of the Housing Development Fund:

- The Housing Development Fund must have its own separate bank account or allocated investments and must be backed by cash or related assets.
- Any contributions to or from the fund must be shown as transfers in the statement of changes in net assets.
- Interest earned on the investments backing up this fund must be recorded as part of interest earned in surplus or deficit for the
 year and can be transferred via the statement of changes in net assets to the Housing Development Fund.

1.12 Heritage assets

The economic entity separately discloses expenditure to repair and maintain heritage assets in the notes to the financial statements (see Note 13).

The economic entity discloses relevant information relating to assets under construction or development in the notes to the financial statements (see Note 13).

Heritage assets are measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Subsequent to initial measurement, heritage assets are carried at cost less any accumulated impairment losses.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.12 Heritage assets (continued)

The group assesses at each reporting date whether there is an indication that a heritage asset may be impaired. If any such indication exists, the group estimates the recoverable amount or the recoverable service amount of the heritage asset.

Transfers from heritage assets are only made when the particular asset no longer meets the definition of a heritage asset.

Transfers to heritage assets are only made when the asset meets the definition of a heritage asset.

The economic entity derecognises heritage assets on disposal, or when no future economic benefits or service potential is expected from its use or disposal.

The gain or loss (the difference between the net disposal proceeds and the carrying value) arising from the derecognition of a heritage asset is included in surplus or deficit when the item is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

1.13 Financial instruments

Classification

The group has the following types of financial assets (classes and categories) as reflected on the face of the statement of financial position or in the notes thereto:

| Class | Category |
|--------------------------------------|---------------------|
| Non-exchange: | |
| Consumer receivables: Property rates | Financial asset mea |
| Evchange | |

Exchange:

Consumer receivables: Services

Investments (long-term of more than three months)

Interest rate swap Redemption fund assets asured at amortised cost

Catamani

Financial asset measured at amortised cost Financial asset measured at fair value Financial asset measured at fair value

The group has the following types of financial liabilities (classes and categories) as reflected on the face of the statement of financial position or in the notes thereto:

Class Category

Exchange:

Long-term loans: Term loans

Long-term loans: Local registered stock Long-term loans: Annuity loans Long-term loans: Municipal bonds

Trade payables:

Payables from exchange transactions

Retention creditors Deposits Bank overdraft Lease liabilities

Service concession arrangement Interest rate swap liability Redemption fund liabilities

Financial liability measured at amortised cost Financial liability measured at amortised cost Financial liability measured at amortised cost Financial liability measured at amortised cost

Financial liability measured at amortised cost Financial liability measured at amortised cost Financial liability measured at amortised cost Financial liability measured at amortised cost Financial liability measured at amortised cost Financial liability measured at amortised cost Financial liability measured at fair value Financial liability measured at fair value

Initial recognition

The group recognises a financial asset or a financial liability in its statement of financial position when the group becomes a party to the contractual provisions of the instrument.

The group recognises financial assets using trade date accounting.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.13 Financial instruments (continued)

Initial measurement of financial assets and financial liabilities

The group measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability not subsequently measured at fair value.

The group first assesses whether the substance of a concessionary loan is in fact a loan. On initial recognition, the group analyses a concessionary loan into its component parts and accounts for each component separately. The group accounts for that part of a concessionary loan that is:

- a social benefit in accordance with the Framework for the Preparation and Presentation of Financial Statements, where it is the
 issuer of the loan; or
- non-exchange revenue in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers), where it is the recipient of the loan.

Subsequent measurement of financial assets and financial liabilities

The group measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value;
- Financial instruments at amortised cost;
- Financial instruments at cost (if applicable).

All financial assets measured at amortised cost or cost are subject to an impairment review.

The group does not apply hedge accounting.

Fair value measurement considerations

The fair value of a financial liability with a demand feature (eg a demand deposit) is not less than the amount payable on demand, discounted from the first date that the amount could be required to be paid.

Reclassification

The group does not reclassify a financial instrument while it is issued or held unless it is:

- a combined instrument that is required to be measured at fair value; or
- an investment in a residual interest that meets the requirements for reclassification.

Where the group cannot reliably measure the fair value of an embedded derivative that has been separated from a host contract that is a financial instrument at a subsequent reporting date, it measures the combined instrument at fair value. This requires a reclassification of the instrument from amortised cost or cost to fair value.

If fair value can no longer be measured reliably for an investment in a residual interest measured at fair value, the group reclassifies the investment from fair value to cost. The carrying amount at the date that fair value is no longer available becomes the cost.

If a reliable measure becomes available for an investment in a residual interest for which a measure was previously not available, and the instrument would have been required to be measured at fair value, the entity reclassifies the instrument from cost to fair value.

Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.13 Financial instruments (continued)

Impairment and uncollectability of financial assets

The group assesses, at the end of each reporting period, whether there is any objective evidence that a financial asset or group of financial assets are impaired.

Financial assets measured at amortised cost

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Derecognition

Financial assets

If, as a result of a transfer, a financial asset is derecognised in its entirety but the transfer results in the entity obtaining a new financial asset or assuming a new financial liability, or a servicing liability, the entity recognises the new financial asset, financial liability or servicing liability at fair value.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

If the transferred asset is part of a larger financial asset and the part transferred qualifies for derecognition in its entirety, the previous carrying amount of the larger financial asset is allocated between the part that continues to be recognised and the part that is derecognised, based on the relative fair values of those parts on the date of the transfer. For this purpose, a retained servicing asset is treated as a part that continues to be recognised. The difference between the carrying amount allocated to the part derecognised and the sum of the consideration received for the part derecognised is recognised in surplus or deficit.

If a transfer does not result in derecognition because the group has retained substantially all the risks and rewards of ownership of the transferred asset, the group continues to recognise the transferred asset in its entirety and recognises a financial liability for the consideration received. In subsequent periods, the group recognises any revenue on the transferred asset and any expense incurred on the financial liability. Neither the asset and the associated liability nor the revenue and the associated expenses are offset.

Financial liabilities

The group removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished — ie when the obligation specified in the contract is discharged, cancelled, expires or waived.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

Presentation

Interest relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense, respectively in surplus or deficit.

Losses and gains relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

A financial asset and a financial liability are only offset and the net amount presented in the statement of financial position when the entity currently has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

In accounting for a transfer of a financial asset that does not qualify for derecognition, the entity does not offset the transferred asset and the associated liability.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

Identification

Statutory receivables are receivables that arise from legislation, supporting regulations, or similar means, and require settlement by another entity in cash or another financial asset.

Carrying amount is the amount at which an asset is recognised in the statement of financial position.

The cost method is the method used to account for statutory receivables that requires such receivables to be measured at their transaction amount, plus any accrued interest or other charges (where applicable) and, less any accumulated impairment losses and any amounts derecognised.

Nominal interest rate is the interest rate and/or basis specified in legislation, supporting regulations or similar means.

The transaction amount (for purposes of this Standard) for a statutory receivable means the amount specified in, or calculated, levied or charged in accordance with, legislation, supporting regulations, or similar means.

Recognition

The economic entity recognises statutory receivables as follows:

- if the transaction is an exchange transaction, using the policy on Revenue from exchange transactions;
- if the transaction is a non-exchange transaction, using the policy on Revenue from non-exchange transactions (Taxes and transfers); or
- if the transaction is not within the scope of the policies listed in the above or another Standard of GRAP, the receivable is recognised when the definition of an asset is met and, when it is probable that the future economic benefits or service potential associated with the asset will flow to the entity and the transaction amount can be measured reliably.

Initial measurement

The economic entity initially measures statutory receivables at their transaction amount.

Subsequent measurement

The economic entity measures statutory receivables after initial recognition using the cost method. Under the cost method, the initial measurement of the receivable is changed subsequent to initial recognition to reflect any:

- interest or other charges that may have accrued on the receivable (where applicable);
- impairment losses; and
- amounts derecognised.

Accrued interest

Where the economic entity levies interest on the outstanding balance of statutory receivables, it adjusts the transaction amount after initial recognition to reflect any accrued interest. Accrued interest is calculated using the nominal interest rate.

Interest on statutory receivables is recognised as revenue in accordance with the policy on Revenue from exchange transactions or the policy on Revenue from non-exchange transactions (Taxes and transfers), whichever is applicable.

Other charges

Where the economic entity is required or entitled in terms of legislation, supporting regulations, by-laws or similar means to levy additional charges on overdue or unpaid amounts, and such charges are levied, the entity applies the principles as stated in "Accrued interest" above, as well as the relevant policy on Revenue from exchange transactions or the policy on Revenue from non-exchange transactions (Taxes and transfers).

Impairment losses

The economic entity assesses at each reporting date whether there is any indication that a statutory receivable, or a group of statutory receivables, may be impaired.

In assessing whether there is any indication that a statutory receivable, or group of statutory receivables, may be impaired, the economic entity considers, as a minimum, the following indicators:

- Significant financial difficulty of the debtor, which may be evidenced by an application for debt counselling, business rescue or an equivalent.
- It is probable that the debtor will enter sequestration, liquidation or other financial re-organisation.
- A breach of the terms of the transaction, such as default or delinquency in principal or interest payments (where levied).
- Adverse changes in international, national or local economic conditions, such as a decline in growth, an increase in debt levels
 and unemployment, or changes in migration rates and patterns.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

Statutory receivables (continued)

If there is an indication that a statutory receivable, or a group of statutory receivables, may be impaired, the economic entity measures the impairment loss as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, or group of statutory receivables, is reduced, either directly or through the use of an allowance account. The amount of the losses are recognised in surplus or deficit.

In estimating the future cash flows, an economic entity considers both the amount and timing of the cash flows that it will receive in future. Consequently, where the effect of the time value of money is material, the entity discounts the estimated future cash flows using a rate that reflects the current risk free rate and, if applicable, any risks specific to the statutory receivable, or group of statutory receivables, for which the future cash flow estimates have not been adjusted.

An impairment loss recognised in prior periods for a statutory receivable is revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows.

Any previously recognised impairment loss is adjusted either directly or by adjusting the allowance account. The adjustment does not result in the carrying amount of the statutory receivable or group of statutory receivables exceeding what the carrying amount of the receivable(s) would have been had the impairment loss not been recognised at the date the impairment is revised. The amount of any adjustment is recognised in surplus or deficit.

Derecognition

The economic entity derecognises a statutory receivable, or a part thereof, when:

- the rights to the cash flows from the receivable are settled, expire or are waived;
- · the economic entity transfers to another party substantially all of the risks and rewards of ownership of the receivable; or
- the economic entity, despite having retained some significant risks and rewards of ownership of the receivable, has transferred
 control of the receivable to another party and the other party has the practical ability to sell the receivable in its entirety to an
 unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the
 transfer. In this case, the entity:
 - derecognise the receivable; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of any statutory receivables transferred are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. The entity considers whether any newly created rights and obligations are within the scope of the Standard of GRAP on Financial Instruments or another Standard of GRAP. Any difference between the consideration received and the amounts derecognised and, those amounts recognised, are recognised in surplus or deficit in the period of the transfer.

1.14 Tax

Current tax assets and liabilities

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at the reporting date, and any adjustment to tax payable in respect of previous years. Current tax liabilities/(assets) for the current and prior periods are measured at the amount expected to be paid to/(recovered from) the tax authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted at the statement of financial position date.

Deferred tax assets and liabilities

A deferred tax liability is recognised for all taxable temporary differences, except to the extent that the deferred tax liability arises from the initial recognition of an asset or liability in a transaction which at the time of the transaction affects neither the accounting surplus nor the taxable profit/(tax loss).

A deferred tax asset is recognised for all deductible temporary differences to the extent that it is probable that the taxable surplus will be available against which the deductible temporary difference can be utilised. A deferred tax asset is not recognised when it arises from the initial recognition of an asset or liability in a transaction which at the time of the transaction affects neither the accounting surplus nor the taxable profit/(tax loss).

A deferred tax asset is recognised for the carry forward of unused tax losses and unused STC credits to the extent that it is probable that the future taxable surplus will be available against which the unused tax losses and unused STC credits can be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Tax expenses

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.14 Tax (continued)

Current and deferred taxes are recognised as income or expense and included in surplus or deficit for the period, except to the extent that the tax arises from:

- a transaction or event which is recognised, in the same or a different period, as net assets; or
- a business combination.

Current tax and deferred taxes are charged or credited to net assets if the tax relates to items that are credited or charged, in the same or a different period, to net assets.

Revenue, expenses and assets are recognised net of the amount of VAT except:

- where the VAT incurred on the purchase of assets or services is not recoverable from the taxation authority, in which case the VAT is recognised as part of the cost of acquisition of the asset or as part of the expense item applicable; and
- receivables and payables that are stated with the amount of VAT included.

The net amount of VAT recoverable from or payable to the taxation authority is reported separate from other receivables or payables in the statement of financial position.

The City of Tshwane Metropolitan Municipality is exempt from tax in terms of Section 10(1)cB(i)(ff) of the Income Tax Act, 1962 (Act 58 of 1962).

The Housing Company Tshwane HCT) is exempt from tax in terms of Section 10(1)cA(ii) of the Income Tax Act.

The Tshwane Economic Development Agency (TEDA) has been registered for tax since the 2013/14 financial year.

1.15 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and building elements, the group assesses the classification of each element separately.

Finance leases - lessor

The group recognises finance lease receivables as assets on the statement of financial position. Such assets are presented as a receivable at an amount equal to the net investment in the lease.

Finance revenue is recognised based on a pattern reflecting a constant periodic rate of return on the group's net investment in the finance lease.

When assets are leased out under a finance lease, the present value of the lease payments is recognised as a receivable. The difference between the gross receivable and the present value of the receivable is recognised as unearned finance income.

Lease income is recognised over the term of the lease using the net investment method, which reflects a constant periodic rate of return.

Finance leases - lessee

The group leases certain property, plant and equipment. Leases of property, plant and equipment where the group assumes substantially all the risks and rewards of ownership are classified as finance leases. The group will not incur a foreign currency lease liability other than that allowed by the Local Government: Municipal Finance Management Act, 2003 (Act 56 of 2003).

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of return on the remaining balance of the liability.

The finance lease assets are depreciated at the same rates as owned property unless the municipality will not obtain ownership. Where there is no reasonable certainty that the municipality will obtain ownership by the end of lease term, the leased assets are depreciated over the shorter of the lease and its useful life.

Any contingent rents are expensed in the period in which they are incurred.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.15 Leases (continued)

The finance lease liabilities are derecognised when the entity's obligation to settle the liability is extinguished. The assets capitalised under the finance lease are derecognised when the entity no longer expects any economic benefits or service potential to flow from the asset.

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term. The difference between the amounts recognised as revenue and the contractual receipts is recognised as an operating lease asset or liability.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in the statement of financial performance.

When assets are leased out under an operating lease, the assets are included in the statement of financial position based on the nature of the asset.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments is recognised as an operating lease asset or liability.

Operating leases are those leases which do not fall within the scope of the above definition of finance leases. Payments made under operating leases are charged against income on a straight-line basis over the period of the lease.

The operating lease liability is derecognised when the group's obligation to settle the liability is extinguished. The operating lease asset is derecognised when the group no longer anticipates economic benefits to flow from the asset.

1.16 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction. Then their costs are their fair value as at the date of acquisition.

Inventories (consumable stores, raw materials, work in progress and finished goods) are measured at the lower of cost and net realisable value. In general, the basis of determining cost is the weighted average cost of commodities.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for:

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

The cost of inventories comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Redundant and slow-moving inventories are identified and written down from cost to net realisable value with regard to their estimated economic or realisable values. Consumables are written down with regard to their age, condition and utility.

Water inventory

Water is regarded as inventory when the Municipality purchases water in bulk with the intention to resell it to consumers or to use it internally, or where the Municipality has incurred purification costs on water obtained from natural resources (rain, rivers, springs, boreholes, etc). However, water in dams that are filled by natural resources that has not yet been treated, and that is under the control of the Municipality but cannot be measured reliably as there is no cost attached to the water, is therefore not recognised in the statement of financial position. The basis of determining the cost of water purchased and not yet sold at the reporting date comprises all costs of purchase, cost of conversion and other costs incurred in bringing the inventory to its present location and condition, net of trade discounts and rebates.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.16 Inventories (continued)

Derecognition of inventory

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories arising from an increase in net realisable value or current replacement cost is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

1.17 Value-added tax (VAT)

The group is registered with the South African Revenue Services (SARS) for VAT on the payment basis in accordance with Section 15(2) of the VAT Act, 1991 (Act 89 of 1991). The group accounts for VAT on the cash basis.

Tshwane Economic Development Agency: The entity is registered with the South African Revenue Services (SARS) for VAT on the invoice basis, in accordance with the VAT Act.

Housing Company Tshwane: The entity pays VAT on the invoice basis under category C - every month.

VAT output refers to tax charged by the Municipality and the entities on a taxable supply and is declared in Part A of the VAT 201 return. Input tax and other deductions are deducted from the output tax liability to arrive at the net VAT payable (or refundable) for any particular tax period.

Revenue, expenses and assets are recognised net of the amount of VAT except:

- where the VAT incurred on the purchase of assets or services is not recoverable from the taxation authority, in which case the VAT is recognised as part of the cost of acquisition of the asset or as part of the expense item applicable; and
- receivables and payables that are stated with the amount of VAT included.

The net amount of VAT recoverable from or payable to the taxation authority is reported separate from other receivables or payables in the statement of financial position.

1.18 Grants-in-aid (expense)

The group annually awards grants to individuals and organisations based on merit. When making these transfers, the group does not:

- receive any goods or services directly in return, as would be expected in a purchase or sale transaction;
- expect to be repaid in future; or
- expect a financial return, as would be expected from an investment.

These transfers are recognised in the financial statements as expenses in the period that the events giving rise to the transfer occurred.

1.19 Impairment of non-cash-generating assets

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The group assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the group estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also annually tests a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating asset's remaining service potential.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.19 Impairment of non-cash-generating assets (continued)

The present value of the remaining service potential of a non-cash-generating asset is determined using the following approach:

Depreciated replacement cost approach

The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the current reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

The replacement cost and reproduction cost of an asset are determined on an "optimised" basis. The rationale is that the economic entity would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an overdesigned or overcapacity asset. Overdesigned assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

When the amount estimated for an impairment loss is greater than the carrying amount of the non-cash-generating asset to which it relates, the group recognises a liability only to the extent that it is a requirement in the Standards of GRAP.

After recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life (RUL).

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.19 Impairment of non-cash-generating assets (continued)

Reversal of an impairment loss

The group assesses, at each reporting date, whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the group estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life (RUL).

Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occurs when there is clear evidence that such a redesignation is appropriate.

1.20 Employee benefits

Termination benefits are employee benefits payable as a result of either:

- an entity's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits.

Short-term employee benefits

When an employee has rendered service to the group during a reporting period, the entity recognises the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted
 amount of the benefits, the group recognises that excess as an asset (prepaid expense) to the extent that the prepayment will
 lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The group measures the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The group recognises the expected cost of bonus, incentive and performance-related payments when the group has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

Post-employment benefits

Multi-employer plans and/or state plans and/or composite social security programmes

The group classifies a multi-employer plan and/or state plan and/or composite social security programme as a defined contribution plan or a defined benefit plan under the terms of the plan (including any constructive obligation that goes beyond the formal terms).

Where a plan is a defined contribution plan, the group accounts for it in the same way as for any other defined contribution plan.

Where a plan is a defined benefit plan, the group accounts for its proportionate share of the defined benefit obligation, plan assets and cost associated with the plan in the same way as for any other defined benefit plan.

When sufficient information is not available to use defined benefit accounting for a plan, that is a defined benefit plan, the group accounts for the plan as if it was a defined contribution plan.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.20 Employee benefits (continued)

Post-employment benefits: Defined contribution plans

When an employee has rendered service to the group during a reporting period, the group recognises the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the reporting date, the group recognises that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another standard requires or permits the inclusion of the contribution in the cost of an asset.

Where contributions to a defined contribution plan do not fall due wholly within twelve months after the end of the reporting period in which the employees render the related service, they are discounted. The rate used to discount reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money are consistent with the currency and estimated term of the obligation.

Post-employment benefits: Defined benefit plans

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability the group recognises actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

Assets held by a long-term employee benefit fund are assets (other than non-transferable financial instruments issued by the reporting entity) that are held by an entity (a fund) that is legally separate from the reporting entity and exists solely to pay or fund employee benefits and are available to be used only to pay or fund employee benefits, and are not available to the reporting entity's own creditors (even in liquidation), and cannot be returned to the reporting entity, unless either:

- the remaining assets of the fund are sufficient to meet all the related employee benefit obligations of the plan or the reporting entity; or
- the assets are returned to the reporting entity to reimburse it for employee benefits already paid.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value of a defined benefit obligation which arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the entity recognises past service cost as an expense in the reporting period in which the plan is amended.

Plan assets comprise assets held by a long-term employee benefit fund and qualifying insurance policies.

The present value of a defined benefit obligation is the present value, without deducting any plan assets, of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

The return on plan assets is interest, dividends and other revenue derived from the plan assets, together with realised and unrealised gains or losses on the plan assets, less any costs of administering the plan (other than those included in the actuarial assumptions used to measure the defined benefit obligation) and less any tax payable by the plan itself.

The group accounts not only for its legal obligation under the formal terms of a defined benefit plan, but also for any constructive obligation that arises from the group's informal practices. Informal practices give rise to a constructive obligation where the group has no realistic alternative but to pay employee benefits. An example of a constructive obligation is where a change in the group's informal practices would cause unacceptable damage to its relationship with employees.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- The present value of the defined benefit obligation at the reporting date;
- Minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- Plus any liability that may arise as a result of a minimum funding requirement.

The amount determined as a defined benefit liability may be negative (an asset). The group measures the resulting asset at the lower of:

- The amount determined above; and
- The present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions
 to the plan. The present value of these economic benefits is determined using a discount rate which reflects the time value of
 money.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.20 Employee benefits (continued)

Any adjustments arising from the limit above are recognised in surplus or deficit.

The group determines the present value of defined benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the consolidated annual financial statements do not differ materially from the amounts that would be determined at the reporting date.

The group recognises the net total of the following amounts in surplus or deficit, except to the extent that another standard requires or permits their inclusion in the cost of an asset:

- Current service cost:
- Interest cost;
- The expected return on any plan assets and on any reimbursement rights;
- Actuarial gains and losses;
- Past service cost:
- The effect of any curtailments or settlements; and
- The effect of applying the limit on a defined benefit asset (negative defined benefit liability).

The group uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

In determining the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost, an entity shall attribute benefits to periods of service under the plan's benefit formula. However, if an employee's service in later years will lead to a materially higher level of benefit than in earlier years, an entity shall attribute benefit on a straight-line basis from:

- the date when service by the employee first leads to benefits under the plan (whether or not the benefits are conditional on further service); until
- the date when further service by the employee will lead to no material amount of further benefits under the plan, other than from further salary increases.

Actuarial valuations are conducted separately for each plan on an annual basis by independent actuaries. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

The group recognises gains or losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on a curtailment or settlement comprises:

- any resulting change in the present value of the defined benefit obligation; and
- any resulting change in the fair value of the plan assets.

Before determining the effect of a curtailment or settlement, the group re-measures the obligation (and the related plan assets, if any) using current actuarial assumptions (including current market interest rates and other current market prices).

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The group offsets an asset relating to one plan against a liability relating to another plan when the entity has a legally enforceable right to use a surplus in one plan to settle obligations under the other plan and intends either to settle the obligations on a net basis, or to realise the surplus in one plan and settle its obligation under the other plan simultaneously.

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money are consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.20 Employee benefits (continued)

- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
 - those changes were enacted before the reporting date; or
 - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, eg, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

Other post-retirement obligations

The group provides post-retirement health care benefits and gratuities upon retirement to some retirees.

The entitlement to post-retirement health care benefits is based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment. Independent qualified actuaries carry out valuations of these obligations. The Municipality also provides a gratuity and housing subsidy on retirement to certain employees. The cost for the benefits will be an expense through surplus or deficit.

The amount recognised as a liability for other long-term employee benefits is the net total of the following amounts:

- The present value of the defined benefit obligation at the reporting date;
- Minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly.

The group shall recognise the net total of the following amounts as expense or revenue, except to the extent that another standard requires or permits their inclusion in the cost of an asset:

- Current service cost;
- Interest cost:
- The expected return on any plan assets and on any reimbursement right recognised as an asset;
- Actuarial gains and losses, which shall all be recognised immediately;
- Past service cost, which shall all be recognised immediately; and
- The effect of any curtailments or settlements.

Tshwane Economic Development Agency (TEDA)

TEDA has a pension fund defined contribution plan where employees pay a fixed amount and the employer pays for the administration fees. The entity further has a group risk plan where employees pay a fixed amount and the employer pays the administration fees which is considered to be a defined contribution plan.

1.21 Provisions and contingencies

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Provisions are not recognised for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are measured at the present value of the expenditures expected to be incurred to settle the obligation. The increase in the provision due to the passage of time is recognised as an interest expense.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the group settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in Note 59.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.21 Provisions and contingencies (continued)

Levies

The liability to pay a levy is recognised progressively if the obligating event occurs over a period of time (ie if the activity that triggers the payment of the levy, as identified by the legislation, occurs over a period of time).

If an obligation to pay a levy is triggered when a minimum threshold is reached, the corresponding liability is recognised when that minimum threshold is reached.

The economic entity recognises an asset if it has prepaid a levy but does not yet have a present obligation to pay that levy.

The following provisions exist within the group:

Clearing of alien vegetation

In terms of the Conservation of Agricultural Resources Act, 1983 (Act 43 of 1983) the provision for the clearing of alien vegetation was established in 2005/06 as a start to address the backlogs that exist.

Landfill sites

The group has an obligation to rehabilitate its landfill sites in terms of its licence stipulations. A provision was established in 2007/08. The amount of the provision is recognised at the present value of the expenditure expected to be required to settle the obligation and is carried at amortised cost.

Quarries

In terms of Section 52(2)(d) of the Mineral and Petroleum Resources Development Act, 2002 (Act 28 of 2002) the City of Tshwane is required to rehabilitate its quarries and borrow pits after these quarries and borrow pits have been closed. The amount of the provision is recognised at the present value of the expenditure expected to be required to settle the obligation and is carried at amortised cost.

Legal proceedings

A provision for legal cost with regard to certain cases is created due to the fact that it was probable (more likely than not) that a present obligation exist at the reporting date and that the municipality will be liable for the legal cost in these cases. The history and nature of these cases further indicate that the liability is more of a long-term nature. The cases included in the provision are still pending and disclosing details will prejudice the position of the municipality in a dispute with other parties on the subject matter. Refer to note 22.

Certain legal claims that have arisen in the normal course of business are disclosed due to a possible outflow in settlement. The amounts disclosed as contingencies are based on the attorney's best estimates of the possible amounts payable.

1.22 Commitments

Commitments represent goods/services that have been ordered, but for which no delivery has taken place at the reporting date. These amounts are not recognised in the Statement of Financial Position as a liability or as expenditure in the Statement of Financial Performance, however are disclosed as part of the disclosure notes. Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Commitments for which disclosure is necessary to achieve a fair presentation should be disclosed in a note to the financial statements, if both the following criteria are met:

- An official communication of an award letter to the successful service provider
- Awards should relate to something other than the routine, steady, state business of the entity therefore salary commitments
 relating to employment contracts or social security benefit commitments are excluded.

The Group discloses capital commitments in the notes to the annual financial statements, A distinction is made between approved and contracted for AND approved but not yet contracted for

The disclosure of commitments entered into before the end of the financial year/reporting date shall be done in the financial statements as prescribed in the following GRAP standards:

- GRAP 1 Presentation of Financial Statements (GRAP 1) requires the disclosure of unrecognised contractual commitments
- GRAP 17 Property, Plant and Equipment (GRAP 17) requires the disclosure of contractual commitments for the acquisition of property, plant and equipment

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.22 Commitments (continued)

 GRAP 31 – Intangible Assets (GRAP 31) requires the disclosure of contractual commitments for the acquisition of intangible assets.

1.23 Revenue from exchange transactions

Revenue is recognised when it is probable that future economic benefits or service potential will flow to the municipality and these benefits can be measured reliably.

Revenue from exchange transactions refers to revenue that accrued to the municipality directly in return for services rendered/goods sold, the value of which approximates the consideration received or receivable.

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction shall be recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- (a) the amount of revenue can be measured reliably;
- (b) it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- (c) the stage of completion of the transaction at the reporting date can be measured reliably;
- (d) the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- The group has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- The group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- The amount of revenue can be measured reliably;
- It is probable that the economic benefits or service potential associated with the transaction will flow to the group; and
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the group;
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight-line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service charges

Service charges relating to electricity, water and sanitation are based on consumption. Waste removal is based on the size of the bin and the number of times it is collected. Meters are read and billed on a monthly basis and revenue is recognised when invoiced. Estimates of consumption are made monthly when meter readings have not been performed. The estimates of consumption are recognised as revenue when invoiced. Adjustments to estimates of consumption are made in the invoicing period when meters have been read. These adjustments are recognised as revenue in the invoicing period. Waste removal services are billed on a monthly basis

Services provided on a prepaid basis

Various services are provided on a prepaid basis in which case no formal billing takes place and revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date.

Income from agency services

Income from agency services is recognised on a monthly basis, limited to the agency fees, once the income collected on behalf of agents has been quantified. The income recognised is in terms of an agency agreement. Amounts collected on behalf of the principal are accounted for as a liability in the statement of financial position.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.23 Revenue from exchange transactions (continued) Housing rental and installments

Income in respect of housing rental and installments are accrued monthly in advance. Finance income from the sale of housing by way of installment sales agreements or finance leases is recognised on a time-proportionate basis.

Collection charges

Collection charges are recognised when such amounts are incurred/earned.

Rental of facilities and equipment

Revenue from the rental of facilities and equipment is recognised on a straight-line basis over the term of the lease agreement.

Interest income

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the group, and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

Interest earned on investments is recognised on a time-proportionate basis that takes into account the effective yield on the investments. Interest earned on outstanding debtors is recognised on a time-proportionate basis.

1.24 Revenue from non-exchange transactions

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

Revenue received from conditional grants, donations and funding is recognised as revenue to the extent that the Municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. A liability is recognised to the extent that the criteria, conditions or obligations have not been met.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, is recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Taxes (property rates for municipalities)

The municipality recognises an asset in respect of taxes when the taxable event occurs and the asset recognition criteria are met.

Resources arising from taxes satisfy the definition of an asset when the municipality controls the resources as a result of a past event (the taxable event) and expects to receive future economic benefits or service potential from those resources. Resources arising from taxes satisfy the criteria for recognition as an asset when it is probable that the inflow of resources will occur and their fair value can be reliably measured. The degree of probability attached to the inflow of resources is determined on the basis of evidence available at the time of initial recognition, which includes, but is not limited to, disclosure of the taxable event by the taxpayer.

The municipality analyses the taxation laws to determine what the taxable events are for the various taxes levied.

The taxable event for property tax is the passing of the date on which the tax is levied, or the period for which the tax is levied, if the tax is levied on a periodic basis.

Taxation revenue is determined at a gross amount. It is not reduced for expenses paid through the tax system.

Transfers

Transferred assets are measured at their fair value as at the date of acquisition.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.24 Revenue from non-exchange transactions (continued)

Fines

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the municipality.

Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting entity.

Bequests

Bequests that satisfy the definition of an asset are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality, and the fair value of the assets can be measured reliably.

Public contributions, sponsorships and donations, including goods in kind

Public contributions, sponsorships and donations, including goods in kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Services in kind

The municipality recognises services in kind that are significant to its operations and/or service delivery objectives as assets and recognise the related revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Grants, donations and receipts

Revenue received from conditional grants, donations and funding is recognised as revenue to the extent that the group has complied with any of the criteria, conditions or obligations embodied in the agreement. A liability is recognised when the criteria, conditions or obligations have not been met.

1.25 Operating expenses

The definition of expenses encompasses expenses that arise from the ordinary activities of the group.

Under the accrual basis of accounting, expenses are recognised when incurred, usually when goods are received or services are rendered. This may not be when the goods or services are actually paid for.

The point at which an expense is recognised is dependent on the nature of the transaction or other event that gives rise to the expense.

1.26 Translation of foreign currencies

Foreign currency transactions

Foreign currency transactions are translated into the functional currency of the group (ie South African rand) using the rate of exchange prevailing on the date of the transaction. Trade creditors denominated in foreign currency are reported at the statement of financial position date by using the exchange rate at that date. Exchange differences arising on the settlement of creditors or on reporting of creditors at rates different from those at which they were initially recorded during the period are recognised as revenue or as expense in the period in which they arise.

Where a transaction is covered by a forward exchange contract, the rate specified in the contract is used. The group will not incur a foreign currency liability other than that allowed by the Local Government: Municipal Finance Management Act, 2003 (Act 56 of 2003).

1.27 Comparative amounts

Where necessary, comparative amounts have been reclassified to conform to changes in presentation in the current year. Refer to Note 63.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.27 Comparative amounts (continued)

Where accounting errors have been identified in the current financial year, the correction is made retrospectively as far as it is practical and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as it is practical and the prior year comparatives are restated accordingly.

The comparative amounts (accounting policy and disclosures) may not be consistent with the current year accounting policies and disclosures due to the implementation of the amended GRAP standards.

1.28 Unauthorised expenditure

Unauthorised expenditure means any expenditure incurred by the group otherwise than in accordance with Section 15 or 11(3) of the Municipal Finance Management Act (Act 56 of 2003), and includes:

- overspending of the total amount appropriated in the group's approved budget;
- overspending of the total amount appropriated for a vote in the approved budget;
- expenditure from a vote unrelated to the department or functional area covered by the vote;
- expenditure of money appropriated for a specific purpose, otherwise than for that specific purpose;
- spending of an allocation referred to in paragraph (b), (c) or (d) of the definition of "allocation" otherwise than in accordance with any conditions of the allocation; or
- a grant by the group other than in accordance with the Municipal Finance Management Act.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense.

The group follows the guidance provided in annexure D of MFMA Circular no 68 to account for Council decision to recover or write-off unauthorised expenditure.

1.29 Fruitless and wasteful expenditure

Fruitless and wasteful expenditure means expenditure which is made in vain and would have been avoided had reasonable care been exercised

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in surplus or deficit in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense.

The group follows the guidance provided in annexure D of MFMA Circular no 68 to account for Council decision to recover or write-off fruitless and wasteful expenditure.

1.30 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Local Government: Municipal Finance Management Act, 2003 (Act 56 of 2003), the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000), or the Public Office Bearers Act, 1998 (Act 20 of 1998), or in contravention of the Municipality's Supply Chain Management Policy. Irregular expenditure excludes unauthorised expenditure.

Irregular expenditure is accounted for as an expense in surplus or deficit in the period it occurred, and where recovered.

The City follows the guidance provided in annexure D of MFMA Circular no 68 to account for Council decision to recover or write-off irregular expenditure.

1.31 Borrowing costs

Borrowing costs are interest and other expenses incurred by an entity in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the period in which they are incurred.

1.32 Accounting by principals and agents

Identification

An agent is an entity that has been directed by another entity (a principal), through a binding arrangement, to undertake transactions with third parties on behalf of the principal and for the benefit of the principal.

A principal is an entity that directs another entity (an agent), through a binding arrangement, to undertake transactions with third parties on its behalf and for its own benefit.

A principal-agent arrangement results from a binding arrangement in which one entity (an agent), undertakes transactions with third parties on behalf, and for the benefit of, another entity (the principal).

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.32 Accounting by principals and agents (continued)

Identifying whether an entity is a principal or an agent

When the municipality is party to a principal-agent arrangement, it assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement.

The assessment of whether an municipality is a principal or an agent requires the municipality to assess whether the transactions it undertakes with third parties are for the benefit of another entity or for its own benefit.

Binding arrangement

The economic entity assesses whether it is an agent or a principal by assessing the rights and obligations of the various parties established in the binding arrangement.

Where the terms of a binding arrangement are modified, the parties to the arrangement re-assess whether they act as a principal or an agent.

Assessing which entity benefits from the transactions with third parties

When the economic entity in a principal-agent arrangement concludes that it undertakes transactions with third parties for the benefit of another entity, then it is the agent. If the economic entity concludes that it is not the agent, then it is the principal in the transactions.

The economic entity is an agent when, in relation to transactions with third parties, all three of the following criteria are present:

- It does not have the power to determine the significant terms and conditions of the transaction.
- It does not have the ability to use all, or substantially all, of the resources that result from the transaction for its own benefit.
- It is not exposed to variability in the results of the transaction.

Where the economic entity has been granted specific powers in terms of legislation to direct the terms and conditions of particular transactions, it is not required to consider the criteria of whether it does not have the power to determine the significant terms and conditions of the transaction, to conclude that is an agent. The economic entity applies judgement in determining whether such powers exist and whether they are relevant in assessing whether the economic entity is an agent.

Recognition

The economic entity, as a principal, recognises revenue and expenses that arise from transactions with third parties in a principal-agent arrangement in accordance with the requirements of the relevant Standards of GRAP.

The economic entity, as an agent, recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal in accordance with the requirements of the relevant Standards of GRAP.

The economic entity recognises assets and liabilities arising from principal-agent arrangements in accordance with the requirements of the relevant Standards of GRAP.

1.33 Budget information

A 10% deviation on operational revenue and expenditure versus the final budget are seen as material and for capital expenditure the percentage deviation is 5%. This percentage is based on management's estimate and is considered to be appropriate. All material differences are explained in the notes to the annual financial statements.

The approved budget is prepared on an accrual basis and presented by economic classification linked to performance outcome objectives. The approved budget covers the fiscal period from 1 July 2019 to 30 June 2020.

The consolidated annual financial statements and the budget are on the same basis of accounting (ie accrual basis); Therefore a comparison with the budgeted amounts for the reporting period has been included in the Statement of comparison of budget and actual amounts (appropriation statement in terms of Circular 67 of the National Treasury). The statement of comparison of budget and actual information has been included in the consolidated annual financial statements as the recommended disclosure when the consolidated annual financial statements and the budget are on the same basis of accounting as determined by the National Treasury.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.34 Related parties

A related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control

The City controls two municipal entities (TEDA and HCT) and has investment in joint venture (TAHSEZ). These forms part of related parties. Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Management is considered a related party, and comprises Councillors, Executive Mayor, Mayoral Committee Members, City Manager and all other Section 56 and 57 employees (refer to Note 38, 39 and 40).

Close family members of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the Municipality

The group discloses the nature of the related party relationship as well as information about those transactions and outstanding balances as a note to the financial statements. (refer to Note 62).

1.35 Events after the reporting date

The group will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The group will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.36 Service concession arrangements: Entity as grantor

Recognition of asset and liability

The group recognises an asset provided by the operator and an upgrade to an existing asset of the entity as a service concession asset if the entity controls or regulates what services the operator must provide with the asset, to whom it must provide them, and at what price, and if the entity controls (through ownership, beneficial entitlement or otherwise) any significant residual interest in the asset at the end of the term of the arrangement. This applies to an asset used in a service concession arrangement for its entire economic life (a "whole-of-life" asset).

After initial recognition or reclassification, service concession assets are clearly distinguished from other assets within the same asset category, and are clearly identified as owned and/or leased assets.

Where the group recognises a service concession asset, and the asset is not an existing asset of the entity (grantor), the entity (grantor) also recognises a liability.

The group does not recognise a liability when an existing asset of the entity is reclassified as a service concession asset, except in circumstances where additional consideration is provided by the operator.

Measurement of asset and liability

The group initially measures the service concession asset as follows:

- Where the asset is not an existing asset of the entity, the asset is measured at its fair value.
- Where the asset is an existing asset of the entity and it meets the recognition criteria of a service concession asset, the asset is reclassified as a service concession asset, and the asset is accounted for in accordance with the policy on Investment property, Property, plant and equipment, Intangible assets, or Heritage assets, as appropriate.

The group initially measures the liability at the same amount as the service concession asset, adjusted by the amount of any other consideration from the group to the operator, or from the operator to the group.

Financial liability model

Where the group has an unconditional obligation to pay cash or another financial asset to the operator for the construction, development, acquisition or upgrade of a service concession asset, the group accounts for the liability as a financial liability.

The group allocates the payments to the operator and accounts for them according to their substance as a reduction in the liability recognised, a finance charge and charges for services provided by the operator.

The finance charge and charges for services provided by the operator in a service concession arrangement are accounted for as expenses.

Where the asset and service components of a service concession arrangement are separately identifiable, the service components of payments from the group to the operator are allocated by reference to the relative fair values of the service concession asset and the services.

Where the asset and service components are not separately identifiable, the service component of payments from the group to the operator is determined using estimation techniques.

Grant of a right to the operator model

Where the group does not have an unconditional obligation to pay cash or another financial asset to the operator for the construction, development, acquisition or upgrade of a service concession asset, and grants the operator the right to earn revenue from third-party users or another revenue-generating asset, the group accounts for the liability as the unearned portion of the revenue arising from the exchange of assets between the group and the operator.

The group recognises revenue and reduces the liability according to the substance of the service concession arrangement.

Dividing the arrangement

If the group pays for the construction, development, acquisition or upgrade of a service concession asset partly by incurring a financial liability and partly by the grant of a right to the operator, it accounts separately for each part of the total liability.

Other liabilities, contingent liabilities and contingent assets

The group accounts for other liabilities, contingent liabilities and contingent assets arising from a service concession arrangement in accordance with the policy on Provisions, Contingent liabilities and contingent assets, and Financial instruments.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Summary of significant accounting policies

1.36 Service concession arrangements: Entity as grantor (continued)

Other revenues

The group accounts for revenues from a service concession arrangement, other than those relating to the grant of a right to the operator model, in accordance with the Standard of GRAP on Revenue from exchange transactions.

Recognition of the performance obligation and the right to receive a significant interest in a service concession asset

If the group controls a significant residual interest in a service concession asset at the end of the service concession arrangement through ownership, beneficial entitlement or otherwise, and the arrangement does not constitute a finance or an operating lease, the group recognises its right to receive the residual interest (ie a receivable) in the service concession asset at the commencement of the arrangement.

The right to receive a residual interest in the service concession asset to be received at the end of the arrangement is an exchange consideration. This is because the group will receive an asset in exchange for granting the operator access to the asset while providing a mandated function on its behalf in accordance with the substance of the arrangement.

In terms of the policy on revenue from exchange transactions, the exchange consideration is recognised and measured at fair value. The value of the receivable (the right to the residual interest in the asset) that is receivable at the end of the service concession arrangement reflects the value of the service concession asset as if it were already in the age and in the condition expected at the end of the service concession arrangement.

When the group recognises the right to receive a residual interest in the service concession asset, it also recognises its performance obligation for granting the operator access to the service concession asset in accordance with the substance of the arrangement. The value of the performance obligation is the same as the receivable interest recognised at the commencement of the service concession arrangement.

The performance obligation is reduced and revenue is recognised based on the substance of the arrangement.

Where service concession arrangements include provisions to adjust the arrangements for changes, the effect of such changes is deemed to have taken place at the inception of the service concession arrangements.

1.37 Interest in jointly controlled assets

In respect of its interest in jointly controlled assets, the municipality recognises in its annual financial statements:

- its share of the jointly controlled assets, classified according to the nature of the assets;
- any liabilities that it has incurred;
- its share of any liabilities incurred jointly with the other venturers in relation to the joint venture;
- any revenue from the sale or use of its share of the output of the joint venture, together with its share of any expenses incurred by the joint venture; and
- any expenses that it has incurred in respect of its interest in the joint venture.

1.38 Investments in Municipal Entities

In the municipality's separate annual financial statements, investments in municipal entities are carried at cost.

1.39 Investment in joint ventures

A joint venture is a binding arrangement whereby two or more parties are committed to undertake an activity that is subject to joint control.

Joint control is the agreed sharing of control over an activity by a binding arrangement, and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the ventures).

Investment in joint venture is accounted at cost in the separate financial statement of the municipality

Notes to the Consolidated Annual Financial Statements

2. New standards and interpretations

Standards and interpretations effective and adopted in the current year 2.1

In the current year the group has incorporated and applied the following effective new standards and interpretations that became effective during the 2019/20 Financial year

Inventory pledged as security

No inventory is pledged as security.

2019/20:

According to Logistic Division the value of the theft and damaged inventory increased significantly from prior year to current year, whilst shortages and obsolete inventory improved form prior year. According to the Utility Services Department based on the measurement of the coal at the power stations, the coal deteriorated, however showing a significant improvement on the amount needed to be written down compared to prior year.

2018/19 financial year:

According to the Utility Services Department and the measurement of the coal at the power stations, the coal deteriorated and therefore the amount below has been written down.

The write down of the general inventory is only done at year end. The amount shown below is the net of surpluses and losses.

| | Write-down of inventory (included in | | | | |

Housing loans

6.

Housing loans were granted to qualifying individuals in terms of the Provincial Administration's Housing Programme. These loans attracted interest of 13,5% per annum and are repayable over periods of 20 and 30 years. These loans have various terms applicable. No new loans were issued in the current financial year.

Loans to sport clubs

Notes to the Consolidated Annual Financial Statements

| | Group | | Municipality | |
|------|-------|------|--------------|--|
| 2020 | 2019 | 2020 | 2019 | |

Sport clubs that qualified signed a 99-year leasehold agreement with the Municipality at a nominal amount and were provided with financial assistance from the Municipality to build or improve a facility for which the funds are repayable over a period and the club has no claim to the improvements after the expiration of the leasehold agreement.

Sale of land debtors

Vacant properties are sold through a process administered by Property Legal Services. Contracts are signed and advices for the opening of individual accounts, which indicate the amount of the deposit (10%) and VAT (14% up to March 2018 and 15% from 1 April 2018), are issued. The contract stipulates from when interest is payable (immediately after signing the contract or after 12 months). The interest rate used is the Municipality's mortgage bond rate which currently is 9%. Interest is calculated monthly on the outstanding balance of the property.

As from 1 March 2014 all land sales are conducted on payment of the full amount to the Municipality by the purchaser. No extended payment terms are offered and full payment is required on registration.

7. Redemption fund

The redemption fund, previously referred to as the sinking fund is, a financial solution to assist the City of Tshwane in meeting its financial obligations to repay previously issued bonds. The City of Tshwane pays contributions into the fund so as to enable the Municipality to receive contributions plus growth to repay redemptions of the bonds when they fall due.

The service of the third party fund manager was in place in the City of Tshwane for two thirds of the 2018/19 financial year as the said contract was terminated. However, the strategy that was adopted and approved by the City of Tshwane still remains in force for its intended duration without any deviation.

The latter is part of the risk management framework adopted by the City of Tshwane. The assets and liabilities are disclosed below.

7. Redemption fund (continued)

Collateral:

The total investments pledged as collateral for City of Tshwane Bonds. The investments pledged as collateral cannot be sold until the related liability is settled in full. The terms and conditions are such that the collateralised asset upon maturity should be of the same value as the liability to ensure that the liability can be redeemed.

The Nedbank and FFO collateral is the collateral paid plus accrued interest.

Composition of fund assets and liabilities:

The maturity date of bonds is: 21 December 2026.

The maturity dates are 12 January 2033, 19 January 2028 and 15 June 2028 respectively. The fair value of the redemption fund portfolio is R1 796 491 042 (2019 = R1 172 713 805).

|------|-----------|------|-----------|
| 2020 | 2019 | 2020 | 2019 |
| | Restated* | | Restated* |

10. Property, plant and equipment (continued)

An entity shall assess at each reporting date whether there is any indication that the entity's expectations about the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the entity shall revise the expected useful life accordingly. The changes shall be accounted for as a change in an accounting estimate in accordance with the Standard of GRAP on Accounting Policies, Changes in Accounting Estimates and Errors. The list of indicators as contained in paragraph 57 of GRAP 17 was used as guidance.

Treatment of all useful lives to be adjusted: All remaining useful lives that were adjusted for the 2019/2020 financial year are disclosed in the financial statements as a change in estimate in accordance with GRAP 3 (refer to note 63). All changes in estimates occurs prospectively and no prior year adjustments were made. All review of useful life adjustments occurred with effect from 1 July 2019. The following were the reasons for the review of useful life adjustments:

Consumer meters:

For all consumer meters having a remaining useful life (RUL) of less than or equal to 24 months, the RUL as at 1 July 2019, was increased with an additional 25 months as per the methodology.

All other assets: The following condition grading scale was used in 2019/2020 to test the remaining useful lives (RUL) of the assets in comparison to the condition of the asset:

Grade 1: Very good - sound structure, well maintained, only normal maintenance required : Average 91% indicative RUL

Grade 2: Good - Serves needs but minor deterioration (<5%), minor maintenance required : Average 71% indicative RUL

Grade 3: Fair - Marginal, clearly evident deterioration (10 - 20%), significant maintenance required : Average 51% indicative RUL

Grade 4: Poor - Significant deterioration of structure and/or appearance, significant impairment of functionality (20 - 40%, significant renewal/upgrade required : Average 31% indicative RUL

Grade 5: Very poor - Unsound, failed needs reconstruction/replacement (50% needs replacement): Average 11% indicative RUL * See Note 59

Consideration was given to the assessment of the asset and where the conditions of assets are indicated as either, very good, good or fair and in these instances the RUL was not adjusted. Where no indication was made by custodian departments it was assumed that the assets are still in use and in a fair condition, hence the expectations do not differ from that of the prior year and therefore no adjustment was made

In instances where the condition of an asset was indicated as very poor the RUL of the asset was determined using the average percentage as per the grading above, however where the average percentage was applied and the RUL amounted to less than 13 months for assets with a condition of very poor, the RUL for the 2019/2020 financial year was extended to 13 months preventing the asset to depreciate to R0 during the year. Ideally during the 2020/2021 financial year these assets must be disposed of in terms the SCM Policy.

In instances where the condition of the asset was indicated as poor the RUL of the asset was determined using the average percentage as per the grading above, however where the average percentage was applied and the RUL amounted to less than 18 months, the RUL was adjusted to 18 months, and where the RUL when applying the average percentage amounted to less than the RUL as at 1 July 2019, the RUL was decreased to the calculated RUL, however where the average percentage was applied and the RUL resulted in a longer RUL the RUL was left unchanged.

In instances where departments indicated the RUL in years and months, the RUL was amended based on the information provided, if realistic.

For all assets having a RUL of 24 months in case of movable assets and 36 months or less in case of immovable and no indication was made by custodian departments, consideration was given to the change in expectation as at 1 July 2019 and a decision was taken by management to amend the RUL as follows:

(i) For movable assets, the RUL were adjusted to 25 months in order to allow for departments to consider the future use of the assets vs. the replacement of these assets.

(ii)For immoveable assets, the RUL were adjusted with a further 37 months seeing that these assets are used in the ordinary delivery of services to the community. Same as for movable assets the responsible departments will have to consider the future use of the assets vs. the replacement/upgrading thereof.

A total of 1 421 532 assets were affected. The change in annual depreciation is a decrease of R100 851 358.01 (Refer to note 63).

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the group.

14. Interest-rate swaps

The Group holds derivative financial instruments to hedge its interest rate risk exposures. The Group entered into interest rate swap contracts that entitle it to receive interest at fixed rates/floating rates on notional principal amounts and that oblige the Group to pay interest at variable rates/fixed rates on the same amounts. The interest rate swap allows the Group to raise long-term borrowings at variable rates/fixed rates and effectively swap them into fixed rates/floating rates in terms of the structured finance contractual requirements. The interest-rate swaps are initially measured at fair value on the contract/trade date; any attributable transaction costs are recognised in profit or loss as incurred. Subsequent to initial recognition, the interest rate swaps are measured at fair value at each reporting date.

The Municipality entered into interest rate swaps with the following role players:

City of Johannesburg: (Trade number - SWD BSA 14)

Trade date: 1 September 2014 and Settlement date: 1 March 2023

Original Nominal amount: R573 557 919 (Current Nominal amount R 246 357 342)

Fixed rate: 9,75% and variable rate: Jibar + 2,55 basis points

Payable: Semi-annual

City of Johannesburg: (Trade number - SWS BK 2RS) Trade date: 30 June 2014 and Settlement date: 30 June 2034

Nominal amount: R1 600 000 000

Fixed rate: 11.0% and variable rate: Jibar + 2,50 basis points

Payable: Semi-annual

City of Johannesburg: (Trade number - 12503628)

Trade date: 18 August 2015 (effective date 29 June 2015) and Settlement date: 29 June 2035

Nominal amount: R1 500 000 000

Fixed rate: 11,48% and variable rate: Jibar + 2,4 basis points

Payable: Semi-annual

City of Johannesburg: (Trade number - 12503643)

Trade date: 20 July 2017 and Settlement date: 23 June 2027

Original Nominal amount R1 000 000 000 (Current Nominal amount R 779 576 245)

Fixed rate: 10.55% and variable rate: Jibar + 2,65 basis points

Payable: Semi-annual

Nedbank: (Trade number - 18569588)

Trade date: 1 April 2014 and Settlement date: 30 June 2026

Original Nominal amount:R943 766 167 (Current Nominal amount R 523 681 817)

Fixed rate: 9,31% and variable rate: Jibar + 2,22 basis points

Payable: Semi-annual

Nedbank: (Trade number - 24157050)

Trade date: 1 April 2014 and Settlement date: 30 June 2026

Nominal amount R890 312 448: Current Nominal amount R 523 681 817

Fixed rate: 9,31% and variable rate: Jibar + 2,22 basis points

Consolidated Annual Financial Statements for the year ended 30 June 2020

Notes to the Consolidated Annual Financial Statements

| | Group | | Municipality | |
|----|-------|-------------------|--------------|-------------------|
| 20 | 020 | 2019 Restated* | 2020 | 2019 Restated* |

Fair values of financial assets measured or disclosed at fair value

Class 1: Interest-rate swaps

The method to determine the fair value of the interest rate swaps is the discounted cash flow method. Various parameters are used to value the swaps, eg start date, end date, payment dates in between, fixed rate, floating rate spread, payment frequency, yield curve, etc. Cash flows are discounted using the zero curve.

Fair value hierarchy of financial assets at fair value

For financial assets recognised at fair value, disclosure is required of a fair-value hierarchy that reflects the significance of the inputs used to make the measurement. The fair-value hierarchy has the following levels:

Level 1: Represents those assets that are measured using unadjusted quoted prices in active markets for identical assets.

Level 2: Applies inputs other than quoted prices that are observable for the assets, either directly (ie as prices) or indirectly (ie derived from prices).

Level 3: Applies inputs that are not based on observable market data.

The City of Tshwane classifies its interest-rate swaps as level 2, and no transfers were made between the different levels of hierarchy in the year under review. None of the financial assets that are fully performing have been renegotiated in the last year.

Nominal value of financial assets at fair value

The original nominal value of the existing interest rate swaps were R6 507 636 534 as at 30 June 2020.

The current nominal value of the existing interest rate swaps are R 5 173 297 221 as at 30 June 2020.

Interest paid on the interest rate swaps to the amount of R64 298 818.78 were recognised in surplus or deficit during 2019/20 as part of finance cost .

Interest paid on the interest rate swaps to the amount of R47 747 346 were recognised in surplus or deficit during 2018/19 as part of finance cost .

The fair value of interest rate swaps for the period under review is as indicated below.

| | Interest rate swap - amounts (in total) Interest rate swap asset Interest swap liability | 31 298 484 (413 339 043) | - (219 999 785) | 31 298 484 (413 339 043) | - (219 999 785) |

The lease liabilities reflected above relate to the lease contract of Fleet Management for the supply of fleet vehicles and fleet-related services. The lease contract of Fleet Management is a public-private partnership agreement between the following companies -* Moipone Group of Companies (Pty) Ltd for the supply of category A and C fleet vehicles and fleet-related services;

the rights to the leased asset revert to the lessor in the event of default. The lease term various related services; and* Fleetmatics VMS (Pty) Ltd for the supply of category B fleet vehicles and fleet-related services Lease liabibetween 27 months and 5 years and the average effective borrowing rate is 10.25%.

Interest rates are variable at the contract date. It is municipality policy to lease certain [property]motor vehicles and equipment under finance leases.

TEDA entered into a lease agreement for photocopy machines for a period of 3 years effective from 1st September 2019. Leasehold improvements for the new offices will be amortised over lease term of 5 years starting from 01 November 2019.

The average effective borrowing rate was 2020 10% (2019: -%).

Interest rates are linked to prime at the contract date. All leases have fixed repayments and no arrangements have been entered into for contingent rent.

The entity's obligations under finance leases are secured by the lessor's charge over the leased assets reported under office equipment.

Market risk

The carrying amounts of finance lease liabilities are denominated in the following currencies: Rand 3 283 435 -

The fair value of finance lease liabilities approximates their carrying amounts.

^{*} Fleet Africa, a division of Super Group Africa (Pty) Ltd for the supply of category E fleet vehicles and fleet-lities are effectively secured as

21. Employee benefit obligations

Pension funds

The municipality and its employees contribute to various pension, provident and retirement funds and its councillors contribute to the Pension Fund for Municipal Councillors. The retirement benefits are calculated in accordance with the rules of the funds. Full actuarial valuations are performed by the relevant funds on a regular basis as per the requirements of the various funds.

Current contributions are charged against the relevant expense account of the municipality at a percentage of the basic salary paid to employees, or allowances in the case of councilors. Pension contributions in respect of employees who were not members of a pension fund (eg gratuity) are recognised as an expense when incurred.

Most employees of the Municipality are members of one of the following funds and those who are not are paid a lump-sum gratuity at retirement age. The Municipality's contributions to these funds are reflected as an expense in the financial statements.

Defined contribution plan (as classified by the relevant fund)

The Municipality contributes to the following defined contribution plans, which are governed by the Pension Fund Act, 1956 (Act 2 of 1956). The total contributions are included under Employee-related Costs, Note 38.

21. Employee benefit obligations (continued)

Defined benefit plan (as classified by the relevant funds):

Tshwane Municipal Pension Fund

The Tshwane Pension Fund is a defined benefit plan. The cost of providing these benefits is determined on the projected unit credit method prescribed by GRAP 25 and actuarial valuations are performed at each reporting date. The retirement benefit obligation presented in the statement of financial position presents the sum of the present value of the obligation less the fair value of plan assets.

151 of the Municipality's employees are members of this fund.

Multi-employer funds

The Municipality contributes to the following defined benefit plans which are governed by the Pension Fund Act. Due to the nature of these funds, the lack of information and the fact that assets are not specifically associated to meet the obligations in respect of individual employers, these funds are accounted for as defined contribution funds in terms of GRAP 25. The total contributions are included in employee-related Costs; See Note 38. The contributions made are as follows:

| SALA Pension Fund The actuarial is carried out annually since 1 July 1998. 353of the Municipality's employees are members of this fund. The Government Employees Pension | 31 369 187 | 31 756 495 | 31 369 187 | 31 756 495 |

| 1 947 of the Municipality's employees are members of this fund. National fund for municipal councillors | 156 541 318 | 147 462 473 | 156 541 318 | 147 462 473 |
| Consolidated retirement for councillors | 120 887 | 145 487 | 120 887 | 145 487 |
| | 191 823 650 | 183 547 935 | 191 823 650 | 183 547 935 |

Medical aid funds

The Municipality provides certain post retirement medical benefits by funding the medical aid contributions of certain retired members of the municipality. According to the rules of the medical aid funds associated with the Municipality, when a member who joined the organisation under the current conditions of service retires, he or she is entitled to remain a member of such medical aid fund on retirement, in which case the Municipality is liable for a certain portion of the medical aid membership fee.

The cost of providing these benefits is determined on the basis of the Projected Unit Credit Method prescribed by GRAP 25. Future benefit values are projected using specific actuarial assumptions and the liability for in-service members is accrued over the expected working lifetime. No plan assets exist and any actuarial gains and losses are recognised immediately.

|------|-------------------|------|-------------------|
| 2020 | 2019 Restated* | 2020 | 2019 Restated* |

21. Employee benefit obligations (continued)

The rate to discount post-employment benefit obligations should be derived from high quality corporate bond yields where the market in such bonds is highly liquid. If the market is not liquid, then government bond yields at the estimated term of the defined benefit obligation should be used. Consequently a discount rate of 8.64% per annum has been used. This rate does not reflect any adjustment for taxation or expenses as per the statement.

Inflation rate (pension fund and gratuities)

While not used explicitly in the valuation, we have assumed the underlying future rate of consumer price inflation (CPI) to be 4.78% per annum. This assumption has been based on the relationship between current conventional bond yields and current index-linked bond yields. The expected inflation assumption was obtained from the differential between index-linked bonds (3.21%) and nominal bonds (8.64%), with a risk premium adjustment for the uncertainty implicit in guaranteeing real increases (0,50%). Therefore, it is determined as follows: (8.64% - 0,5% - 3.21%)/1,0321.

Salary increase

Salary increases have historically exceeded CPI inflation by between 1,0% and 1,5% per annum. We have assumed that salaries will exceed the assumed inflation rate by 1% (pension funds and gratuities).

Expected return on assets

GRAP 25 requires the assumed rate of return on assets to equal the discount rate, namely 8.64%.

Post-retirement discount rate

The fund's pension increase policy aims to grant increases of between 75% and 100% of annual CPI inflation. If an average of 87,5% is assumed, increases of 4,19% per annum will be awarded on average over the long-term. This implies a post-retirement interest rate of 4.28% (from 1,0864/1,028 - 1,0).

Health care cost inflation

A health care cost inflation rate of 6.60% has been assumed. This is 1,50% in excess of the expected CPI inflation over the expected term of the liability, namely 5,10%. A larger differential would be unsustainable, eventually forcing members to less expensive options. This implies a net discount rate of 2.33% which derives from ((1+9,08%)/(1+6.60%))-1.

The expected inflation assumption of 5,10% was obtained from the differential between market yields on index-linked bonds consistent with the estimated term of the liabilities (3.31%) and those of fixed interest bonds (9,41%) with a risk premium adjustment for the uncertainty implicit in guaranteeing real increases (0,50%). This was thus determined as follows: ((1+9.08%-0,50%)/(1+3.31%))-1.

The carrying amount of the rehabilitation provisions increases in each period to reflect the passage of time (also referred to as unwinding of interest).

In terms of GRAP 19, provisions should be evaluated at each reporting date to reflect the best estimate of the cost of rehabilitation at that date of the provision. The discounting rate is 9.90% (2018 = 10.581%). The timing of the outflow is uncertain, as well as the relating amounts due to discounting and changes in inflation rates.

Environmental rehabilitation provision - Landfill sites

Consolidated Annual Financial Statements for the year ended 30 June 2020

Notes to the Consolidated Annual Financial Statements

| | Group | | Municipality | |
|------|-------------------|------|-------------------|--|
| 2020 | 2019 Restated* | 2020 | 2019 Restated* | |

Provisions (continued)

The group has an obligation to rehabilitate its landfill sites in terms of its license stipulations. The amount of the provision is recognised at the present value of the expenditure expected to be required to settle the obligation and is carried at amortised cost.

The net movement in the provision amounted to R27 983 519 increase (2019 = R83 989 619 increase). The decrease in the cost of property, plant and equipment amounted to R24 541 555 (2019 = R10 437 183 increase). The amount recognised in surplus or deficit due to re-estimation where the adjustment exceeds the carrying amount of the asset amounted to R6 373 490 (2019 = R18

274). The amount utilised amounted to R3 422 285 (2019 = R5 962 119).

Clearing alien vegetation

In terms of the Conservation of Agricultural Resources Act, 1983 (Act 43 of 1983) the provision for the clearing of alien vegetation was established to address the backlogs that exist. 2019/20

The net movement in the provision amounted to R 2 815 993 increase (2019 = R4 927 304 increase). The decrease in the cost of property, plant and equipment amounted to R1 279 546 (2019 = R2 274 112). The amount recognised in surplus or deficit due to reestimation where the adjustment exceeds the carrying amount of the asset amounted to R2 365 189 (2019 = R0). The amount utilised

during the year amounted to R1 832 219 (2019 = R3 956 302).

Rehabilitation of quarries

In terms of the Mineral and Petroleum Resources Development Act, 2002 (Act 28 of 2002), Section 52(2)(d), the municipality is

to rehabilitate its quarries and borrow pits after these quarries and borrow pits have been closed. The amount of the provision is recognised at the present value of the expenditure expected to be required to settle the obligation and is carried at amortised cost.

The net movement in the provision amounted to R10 815 366 increase (2019 = R5 756 974 increase). The increase in the cost of property, plant and equipment amounted to R2 122 985 (2019 = R3 043 702). The amount recognised in surplus or deficit due to reestimation where the adjustment exceeds the carrying amount of the asset amounted to R6 081 273 (2019 = R1 073 137). The amount utilised during the year amounted to R3 073 119 (2019 = R3 003 695).

Legal proceedings provision

A provision for legal cost with regard to certain cases was created due to the fact that it was probable (more likely than not) that a

obligation existed at the reporting date and that the municipality will be liable for the legal cost in these cases. The history and nature

these cases further indicate that the liability is more of a long-term nature.

2019/20

The net movement in the provision amounted to R294 642 368 increase (2019 = R31 140 453 decrease). The amount utilised during

vear amounted to R2 383 128 (2019 = R11 981 020).

The cases included in the provision is still pending and disclosing details will prejudice the position of the municipality in a dispute

other parties on the subject matter.

Due to the nature of the legal cases it is not foreseen that it will be finalised within the next 12 months and therefore there is no shortterm

portion

Due to the nature of the legal cases, it is not foreseen that it will be finalised within the next 12 months and therefore there is no short-term portion.

23. Service concession arrangement

Tshwane Broadband Network:

The City of Tshwane has entered into a build operate and transfer agreement with Newshelf 1327 (Pty) Ltd (in the process of being renamed as Thobela Telecoms (RF)(Pty) Ltd), to finance, construct and operate a municipal broadband network. This agreement will be subject to review once every three years. The service provider is appointed to build the network and to provide operational services, additional services and maintenance services to the City of Tshwane.

The private party will obtain project finance for the build phase of the network and once the minimum threshold is achieved, the Municipality shall pay the private party on the basis set out in the agreement. From the effective date until the acceptance date of the last section of the Network Built ("First phase") the municipality commits to pay a monthly amount to the service provider as calculated in the formula set out in clause 37.2 (the "Build Payment Formula"). This payment will only start once the minimum threshold is achieved.

The City has requested the High Court to review the above transaction. The matter was heard in court in May 2018 and the parties are awaiting the judgement of the High Court.

On 24 August 2020, the Supreme Court of Appeal heard the case for appeal against the setting aside of the BOT contract. Judgement was handed down on 5 October 2020 where the appeal was upheld with costs for the two counsel. Furthermore, the order of the court was set aside and replaced with "the application is dismissed with cost including those of two counsel

Tshwane House:

The City of Tshwane has entered into a service concession agreement with Tsela Tshweu (the Consortium), a private Consortium led by Group 5, to finance, construct and operate the Tshwane Head Office. The agreement is for a period of 27 years of which 2 years was for the construction of the property and 25 years to operate the property on behalf of City of Tshwane. At the end of the 27 year agreement ownership of the building will pass to the City of Tshwane. The agreement is in the third year of the operational stage. Occupation took place in June 2017.

For the 2019/20 financial year the value of the asset and liability amounted to R 1 010 641 988 and R 1 173 478 189 respectively. For the 2018/19 financial year the value of the asset and liability amounted to R1 048 306 306 and R1 147 216 010 respectively.

The service concession liability in respect of Tshwane House is indicated below:

| Minimum future payments | | | | |

23. Service concession arrangement (continued)

Denneboom Station Public Transport Interchange:

The City of Tshwane entered into a service concession and lease agreement with the Concessionaire (Interdent Management Services (Pty) Ltd.) on 7 September 2012 in terms of which the Concessionaire obtained the right to lease Erven 35385, Mamelodi, Ext 13; Erf 40331 Mamelodi Ext 24 and Portion 2 of Erf 19687, Mamelodi (the Properties) to develop the properties at its cost as an interchange for public transport and for commercial purposes for its own cost and account. The City will throughout the currency of the agreement, retain the full and undisturbed right to regulate, manage and administer the taxi operations through, over or on the interchange and the allocation or lease of bus or taxi rank space and holding areas on the properties.

Interdent Management Services is granted the right to earn revenue from third-party users of the service concession asset as they are entitled to rent for their own account lettable space in the Interchange to users. Interdent Management Services also receives a non-cash compensation from the City by getting a rebate from property rates. The City does not incur a cost directly for acquiring the service concession asset as the development will be funded by a private developer.

Upon the termination of the service concession for whatever reason, whether as a consequence of the effluxion of time or otherwise, all buildings and other permanent structures on the interchange shall remain the property of the City. The service concession agreement will lapse after 29 years and 11 months.

Construction commenced in September 2016 and the fair value as at 30 June 2018 being the cost of construction of the building was calculated and stated to be R378 474 359.29. This is also the value of the asset and liability as at 30 June 2018.

The lease term is also 29 years and 11 months as from the effective date and the rental payable by Interdent Management Services (Pty) to the City of Tshwane is R1 per month. As the rental receivable by the City from Interdent Management Services is not material, disclosure thereof has been omitted purposely.

The service concession liability in respect of Denneboom Station Public Transport Interchange is indicated below:

The service concession Asset & liability In respect of Denneboom station Public Transport Interchange is indicated below

2018/19

As at 30 August 2019, the concessionaire had failed to submit to the city sufficient and appropriate supporting documentation thus no value was disclosed in the annual financial statements in relation to this matter.

Based on new developments retrieved post the submission of the annual financial statements to the Auditor General, management decided to adjust the value disclosed for the asset under construction (AUC) - Denneboom service concession based on an estimation supported by the below stated assumptions-

- The progress of construction is consistent throughout the months stipulated within the building phase
- The cost of construction is incurred evenly throughout the period.
- The total cost of construction incurred is aligned within the budgeted cost of construction as stipulated in the Service Concession Agreement documents.
- The construction delays noted equally extended the initial completion date of which yielded the calculated percentage of completion as at 30 June 2020.

2019/20

During the current financial year under review- the service concessionaire submitted financial cost reports backdating from the commencement of the construction pertaining to the asset concerned. Based on the latter noted, the closing balance of the prior

year was increased by R 423 079 921 through a restatement journal. The actual cost as at 30 June 2020 as per the cost report totaled R 62 996 291. As at 30 June 2020 the building was established to be at a under construction building status. Below are the

updated cost both for the current and prior year respectively.

The land value was changed to market value according to the Municipal Property Rates Act, 2004 (Act 6 of 2004) (MPRA) that came into effect on 1 July 2008. The increase in valuation is due to the fact that the full market value of a property is now the basis of levying rates and not the land value

No difference is made between land value and the value of improvements and only the market value appears on the valuation roll. With the implementation of the MPRA, different categories of properties are levied at different tariffs with different rebates applicable

Property owners of 60 years and older and/or physically or mentally disabled, who can substantiate receipt of a social pension, and owners certified by the Medical Officer of Health as physically or mentally disabled, can qualify for a rebate, subject to certain conditions.

Notes to the Consolidated Annual Financial Statements

| | Group | | Municipality | |
|------|-------------------|------|-------------------|--|
| 2020 | 2019 Restated* | 2020 | 2019 Restated* | |

36. Government grants, subsidies, awards and donations (continued)

Equitable Share

Iln terms of the Constitution, this grant is used to subsidise the provision of basic services to indigent community members.

All registered indigents receive a monthly subsidy of R560.00 (2019 = R510.69), which is funded from the grant.

| Current-year receipts Conditions met - transferred to revenue | 2 642 492 259 (2 642 492 259) | 2 398 120 000 (2 398 120 000) | 2 642 492 259 (2 642 492 259) | 2 398 120 000 (2 398 120 000) |
|--|----------------------------------|----------------------------------|----------------------------------|----------------------------------|
| | | - | | - |
| Fuel Levy (DoRA) | | | | |
| Current year receipts Conditions met - transferred to revenue | 1 451 890 000 (1 451 890 000) | 1 449 121 000 (1 449 121 000) | 1 451 890 000 (1 451 890 000) | 1 449 121 000 (1 449 121 000) |
| | | | | |

The purpose of the fuel levy grant is to provide for basic services and infrastructure development in under-serviced communities, specifically to transport infrastructure, given the link between fuel sales and road usage.

Primary Healthcare Subsidy (Provincial)

| Current-year receipts Conditions met - transferred to revenue | 52 096 000 (52 096 000) | 49 837 000 (49 837 000) | 52 096 000 (52 096 000) | 49 837 000 (49 837 000) |
|---|----------------------------|----------------------------|----------------------------|----------------------------|
| Conditions met - transferred to revenue | (52 096 000) | (49 637 000) | (52 096 000) | (49 637 000) |
| | - | - | - | - |

The Municipality renders health services on behalf of the provincial government. The purpose of this subsidy is to render comprehensive primary healthcare services according to service-level agreements. This subsidy has been used exclusively to fund clinic services. The conditions of the subsidy have been met.

Emergency Management Services Subsidy (Provincial)

| Current-year receipts | - | 40 854 000 | - | 40 854 000 |
|---|---|--------------|---|--------------|
| Conditions met - transferred to revenue | - | (40 854 000) | - | (40 854 000) |
| | | | | |

The Municipality renders ambulance services on behalf of the provincial government and is reimbursed. The purpose of this subsidy is to ensure rapid and effective emergency care. This grant has been used exclusively to fund the rendering of ambulance services (included in the Emergency Medical Services vote in Appendix D). The conditions of the subsidy have been met.

Electricity for All (INEP)

| Current-year receipts Conditions met - transferred to revenue | 40 000 000 (40 000 000) | | 40 000 000 (40 000 000) |
|---|--------------------------------|---|----------------------------|
| | - | _ | - |

The grants was discontinued in the 2019/20 financial year, incorporated into the USDG.

The purpose of the grant is to implement the Integrated National Electrification Program (INEP) by providing capital subsidies to municipalities to address the electrification backlog of occupied residential dwellings, the installation of bulk infrastructure and rehabilitation and refurbishment of electricity infrastructure in order to improve quality of supply.

Notes to the Consolidated Annual Financial Statements

| | Group | | icipality |
|------|-------------------|------|-------------------|
| 2020 | 2019 Restated* | 2020 | 2019 Restated* |

36. Government grants, subsidies, awards and donations (continued)

The request for roll over of the 2017/18 balance was not approved by National Treasury and it was repaid during 2018/19.

During the month of November 2013, severe damaged was caused to infrastructure by hail in Gauteng Province. To this effect, a provincial state of disaster was declared in Gauteng, City of Tshwane in December 2013. The infrastructure and services damage reports and preliminary costing of damages were submitted by the Department of Human Settlements and the City of Tshwane Metropolitan Municipality for infrastructure damage through the Gauteng Provincial Disaster Management Centre in May 2014.

Social Infrastructure Grant

36. Government grants, subsidies, awards and donations (continued)

HCT: Gauteng Department of Human Settlement

Conditions still to be met - remain liabilities (see Note 18).

The grant was received from the Gauteng Department of Human Settlement (GDHS) for the development of the Townlands project.

HCT: Social Housing Regulatory Authority

A request for roll over of the 2019/20 balance was submitted to the Provincial Treasury.

The purpose of this grant is to plan, design and construct in Hammanskraal, Winterveldt and Mabopane social development centres.

Integrated City Development

Conditions still to be met - remain liabilities (see note 18).

A request for the roll over of the 2019/20 balance was submitted to National Treasury.

The purpose of this grant from National Treasury is to provide a financial incentive for metropolitan municipalities to integrate and focus their use of all available infrastructure investment and regulatory instruments to achieve a more compact urban spatial form and the development of more inclusive, livable, productive and sustainable urban built environments in metropolitan municipalities

Changes in the level of government grants

Based on the allocations set out in the Division of Revenue Act no significant changes in the level of government grant funding are expected over the forthcoming 3 financial years.

In-kind benefits

The Executive Mayor, Speaker and Members of the Mayoral Committee are full-time employees. Each employee is provided with an office and secretarial support at the cost of the Municipality.

According to the organisational structure of the Municipality, the Executive Mayor Protection Sub-section, has seven staff members, of which five are VIP protection officers. The Members of the Mayoral Committee and the City Manager have two VIP protection officers each.

The Executive Mayor and Members of the Mayoral Committee hae the use of City owned vehicles for official duties.

The allowances and benefits of councillors, loans made to councillors, if any, and payments made to councillors for loss of office, if any, as disclosed above are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Office Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this act.

In-kind benefits were withdrawn upon termination of service.

Remuneration of the Executive Mayor, Speaker and Members of the Mayoral Committee:

For the disclosure of the remuneration of the Executive Mayor, Speaker and Members of the Mayoral Committee, refer to note 38.

40. Remuneration of Top Management

The organisational structure was reviewed and a new macro structure was approved in terms of the Council Resolution dated 24 November 2016. The new macro structure was implemented on 1 February 2017.

In terms of the Council resolution dated 23 February 2017 the proposed Section 56 positions were determined to be as follows:

- ♦ Governance and Support Officer
- Chief Financial Officer
- Chief of Police
- ♦ Chief of Emergency Services
- Chief Operations Officer

Notes to the Consolidated Annual Financial Statements

| Group | | Mun | icipality |
|-------|-------------------|------|-------------------|
| 2020 | 2019 Restated* | 2020 | 2019 Restated* |

Remuneration of Top Management (continued)

- Chief Audit Executive
- Group Head: Office of the Executive Mayor
- Group Head: Communication, Marketing and Events
- Group Head: City Strategy and Organisational Performance.

In terms council resolution dated 30 August 2018 the group head in the office of the city manager is a considered to be direct report to the city manager.

Group Head: Strategy & Management Support

The other positions will from 1 February 2017 report directly either to the Governance and Support Officer (GSO) or the Chief Operations Officer (COO).

Consolidated Annual Financial Statements for the year ended 30 June 2020

Notes to the Consolidated Annual Financial Statements

| | Group | | icipality |
|------|-------------------|------|-------------------|
| 2020 | 2019 Restated* | 2020 | 2019 Restated* |

49. Disposal of a significant asset(s) or a group of assets and liabilities or a component of the entity

Management has taken a decision to dispose of a significant asset /or a group of assets and liabilities /or a component of the entity.

Description of the asset(s), group of assets and liabilities or component

Mostly office furniture and equipment, computer equipment, machinery and equipment and fleet have been marked for disposal and were in the auction yard at the end of the reporting period.

During 2019/20 various assets were sold either through public auction (sale was completed) and through land sales initiated by Group Property Management Department

Carrying values

 Carrying values of the assets
 1 515 953
 327 508
 1 515 953
 327 508

 Carrying value of liabilities
 1 021 967
 1 021 967

Facts and circumstances of the disposal

The assets in the auction yard are mostly furniture and equipment, computer equipment, machinery and equipment and minor infrastructure items that have been marked for disposal as they are in most cases damaged or outdated and no longer fit for usage by the municipality.

Further approvals required

Approval by the City Manager is required to hold an auction.

The expected sale or transfer date is still to be determined.

Disposals completed during the year

During the 2019/2020 financial year the sale of various assets were sold through public auction were completed. The retirement proceeds amounted to R4 644 744 while the net gain amounted to R3 738 517

Circumstances that may have resulted in a decision to dispose of an asset being reversed during the reporting period

None.

53. Unauthorised expenditure (continued)

Action taken: A report served before Council on 27 September 2018 and it was approved that the unauthorised expenditure for the 2017/18 financial year consisting of non-cash items to the amount of R704 224 563 be condoned by Council. It was further approved that the Group Human Capital Management and the Shared Services Department submit reports with detailed explanations on overspending to the Mayoral Committee and to Group Audit and Risk for further investigation of the unauthorised expenditure of R24 695 751. It was further approved that the unauthorised expenditure be referred to the Municipal Public Accounts Committee (MPAC) for further investigation and recommendation to Council.

Action taken: A report served before Council on 25 April 2019 and it was approved that the unauthorised expenditure to the value of R323 144 188 relating to the 2016/17 financial year be condoned and written-off.

A report served before Council on 25 July 2019 and it was approved that the unauthorised expenditure to the value of R263 044 000 relating to 2016/17 and R64 782 499 relating to 2017/18 be written-off. Further an amount of R56 560 000 relating to 2016/17 was recommended to be recovered in line with section 32 of the MFMA,

The over-expenditure by departments can mainly be attributed to employee-related costs, depreciation, impairment of assets, finance charges, bulk purchases, contracted services, general expenses and loss on disposal of property, plant and equipment. Further an amount of R2 720 256 490 relating to a debtor raised in respect of a council resolution to recover irregular expenditure was impaired due to a court order.

^{* *}When analysing the unathorised expenditure of all the departments in aggregate, there is a net underspending of R 196 716 128 on the cash portion and a net overspending on the non cash portion of R 2 445 850 268. Unauthorised expenditure is read as the net of over and under spending thus both figures have to be disclosed to show the net amount.

| 2020 | 2019 | 2020 | 2019 |
| | Restated* | | Restated* |

55. Irregular expenditure (continued)

Cases under investigation

Amounts to be recovered in line with section 32 of the MFMA

After the Council Committee Investigations, Council resolved in April 2019 that irregular expenditure amounting to R3 261 224 440 as well as it through the expost facto cases reported through Group Financial Services and the Bid Adjudication Committee system which were disclosed in the statements be recovered in terms of section 32(2)(b).

Incidents were related to the following:

- * Non-compliance with MFMA, SCM regulations and PPP regulations
- * Section 19(a) of the SCM regulations
- * Non-compliance with MFMA and SCM regulations.

Amounts written-off

After the Council Committee Investigations, Council resolved in April 2019 that irregular expenditure amounting to R27 783 33 uncovered through the ex post facto cases reported through Group Financial Services and the Bid Adjudication Committee system be condoned and written off in terms of section 32(2)(b). Council further certified in July 2019 that irregular expenditure amounting to R226 722 489 be declared as irrecoverable and written off in terms of section 32(2)(b).

Incidents were related to the following:

- * Non-compliance with budgeting process
- * Section 32 of the MFMA
- * Failure of service provider to deliver services which they were appointed for.

56. Deviation from Supply Chain Management Regulations

Paragraph 12(1)(d)(i) of *Government Gazette No. 27636* issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and then reports them to the next meeting of the accounting officer and includes a note to the consolidated annual financial statements.

In terms of section 36(1)(a) of the Supply Chain Management Regulations, the accounting officer may dispense with the official procurement processes in the following instances:

- In an emergency
- If such goods or services are produced or available from a single provider only
- For the acquisition of special works of art or historical objects where specifications are difficult to complete
- Acquisition of animals for zoos and/or nature and game reserves
- In any other exceptional case where it is impractical or impossible to follow the official procurement processes

Deviation from tender and quotation process:

- * Sole suppliers
- * Emergency
- * Impracticality

In terms of section 36 of the Municipal Supply Chain Management Regulations, any deviation from the supply chain management policy needs to be approved/condoned by the accounting officer and noted by the Council. Deviations from the official procurement process during the financial year were approved by the accounting officer and noted by the Council in terms of the delegations as stipulated in the Supply Chain Management Policy. They amount to approximately the following:

Deviation from tender process (amounts above R200 000)

Regulation 45 disclosure

As per Section 45 of the MFMA SCM regulations the notes to the annual financial statements of a municipality must disclose particulars of any award of more than R2 000 to a person who is a spouse, child or parent of a person in the service of the state or has been in the service of the state in the previous 12 months indicating:

- The name of that person
- The capacity in which that person is in the service of the state/municipality; and
- The amount of the award

The information regarding awards made for the financial year is indicated below.

59. Contingencies (continued)

Litigation matters:

The legal claims listed below are those that have arisen in the normal course of business and represent the possible amounts that could be awarded should the claims prove successful. The amounts have been based on the attorney's best estimates of the possible amount payable.

Amounts have not been provided in certain cases as the court has not yet determined a value - these cases are listed separately below. The claims where amounts are available are disclosed in the table below.

Housing Company Tshwane litigation

HCT entered into a contract with Magic Labour for the construction and development of social houusing units on ERF 3525 & 3526, Marabastad, and Pretoria. The project entails development of a high-rise building that will yield 1 200 units. Magic Labour failed to deliver the required units as a result HCT terminated the contract due to non-performance as stipulated on the contract. Magic Labour disputes the termination and claim an amount of R41 654 855.50 in the form of final account.

The entity has terminated the employment contract of the previous COO due to miscounduct and the matter has been referred to arbitration by the claimant. The arbitration has ruled in favour of the COO and the entity is negotiating the settlement offer.

The entity entered into a contract with MIH Projects for construction supervision of Townlands, Marabastad project. During the current financial year 2019/20, the principal agent submitted invoices to the value of R9 326 372 which were disputed based on the fees. After year end, the MIH disputed invoices were resolved. The entity also disputed invoices amounting to R11 025, R499 615, R9 450 ,R44 850 and R18 717 from the Auditor General, Motemela Masele Attorneys, Magesa, Independent Newspapers and Marvcon based on the fees and verifying the service rendered. The total value of disputed invoices amounts to R9 910 029

Contingent Assets:

During the previous three financial financial years 2016 to 2018, the entity has paid an output VAT amounting to R13 280 951 to SARS on the capital grant received from both social Housing Regulatory Authority (SHRA) and City of Tshwane. During the audit of VAT, it was discovered that the entity incorrectly submitted VAT invoices to both SHRA nad City and Tshwane which is contravention with section 11(2) of the VAT act. futhermore, in the previous three years(2015 to 2017), The entity has also claimed input VAT on the apportionment rate method amounting to R5 146 729.62 without SARS's approval on the apportionment method which might pose a risk to SARS claiming back this amount from the entity. The City of Tshwane appointed the VAT specialist (MaxProf) to assist the entity with the recovery process of the VAT and according to their assessment SARS is liable to pay the entity R13 280 951.

On the 13th of March 2018, the entity terminated the construction contract with Magic Labour Hire & Security Service due to poor performance. Management has quantified the value of the latent defects discovered and is claiming R6 801 204 from the Magic Labour Hire and construction guarantee which is held by Power Gurantee (Pty) Ltd..

Housing and Sustainable Human Settlement Development Department:

Case 1:

Claim for compensation by a land owner in Soshanguve. The land owner alleges that the City of Tshwane allowed a squatter camp to develop on privately owned land. The owner now wants compensation arguing constructive expropriation.

Case 2:

A summons has been issued and an appearance to defend has been entered. The crux of the action is to compel the City of Tshwane to allocate land to persons listed in the summons as former residents of Lady Selbourne as mentioned in the summons. A closer look at the summons revealed that looking at the dates of birth of those people; they could never have been former residents of that area. Awaiting court date. Amount claimed cannot be estimated.

Case 3

Dispute of ownership of house. Claim amount is undetermined.

Case 4:

Interdict application and to declare the City's conduct unlawful. Claim amount is undetermined.

Tshwane House Contingencies

Default terminations:

The default termination comprises the default terminations as per the service concession arrangement between the City of Tshwane and TTC. The termination scenarios are as follows:

Scenario 1: Termination pursuant to the City of Tshwane's default prior to the expiry of the concession period

Termination pursuant to the City's default over the life of the project given equal probabilities is R747 million.

Scenario 2: Termination for Private Party default

^{*} See Note 63

Consolidated Annual Financial Statements for the year ended 30 June 2020

Notes to the Consolidated Annual Financial Statements

| | Group | | icipality |
|------|-------------------|------|-------------------|
| 2020 | 2019 Restated* | 2020 | 2019 Restated* |

Contingencies (continued)

If at any time during the concession period the City of Tshwane terminates the PPP pursuant to a default by TTC, the City of Tshwane will be obliged to pay TTC a compensation amount. The expected contingent liability for Private Party default, given the equal probabilities is R540 million.

Scenario 3: Termination for Force Majeure

If the PPP agreement is terminated by the City of Tshwane or TTC as a result of a Force Majeure event, the City of Tshwane is obliged to compensate TTC a Force Majeure termination amount. The expected contingent liability for Force Majeure default over the life of the project, given equal probabilities is R663 million.

Scenario 4: Termination for Corrupt Acts and Fraud

If the City of Tshwane terminates the PPP agreement pursuant to corrupt gifts and payments, the City of Tshwane shall be liable to pay TTC a termination amount. The expected contingent liability under a corrupt acts default scenario over the life of the project, given equal probabilities is R613 million.

There is uncertainty as to the timing of any of the termination scenarios, therefore simulation was used to arrive at the expected contingent liability.

Municipal entities

Housing Company Tshwane:

Case 1:

HCT has terminated the employment contract of the previous COO due to misconduct, and the matter has been referred to arbitration by the claimant. At this point in time the outcome of the case cannot be quantified as to whether the entity will be liable for settlement or not.

Contingent assets

Housing Company Tshwane:

During the previous three financial years (2015/16 to 2017/18) the entity has paid output VAT amounting to R13 280 951 to SARS on the capital grant received from SHRA and the City of Tshwane. During the VAT audit it was discovered that the entity incorrectly submitted VAT invoices to both SHRA and the City of Tshwane which is in contravention of Section 11(2) of the VAT Act. Furthermore, in the previous three financial years (2014/15 to 2016/17), the entity also claimed input VAT on the apportionment rate method amounting to R5 146 729.62 without SARS' approval on the apportionment method which might pose a risk of SARS claiming back this amount from the entity.

On 13 March 2018, the entity terminated the construction contract with Magic Labour Hire and Security Services due to poor performance. Management has quantified the value of latent defects discovered and is claiming R6 801 204.06 from the Magic Labour Hire and construction guarantee which is held by Power Guarantee (Pty) Ltd.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Notes to the Consolidated Annual Financial Statements

| | Group | | icipality |
|------|-------------------|------|-------------------|
| 2020 | 2019 Restated* | 2020 | 2019 Restated* |

60. Going concern

We draw attention to the fact that at June 30, 2020, the group had a current year deficit of -R2 810 554 366 (2019: R 2 723 128 672 surplus) and an accumulated surplus of R 26 741 253 074 (2019: R29 510 316 041) and that the municipality's total assets exceed its liabilities by same. The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realization of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business

The ability of the municipality to continue as a going concern is dependent on a number of factors In performing the going concern assessment, the accounting officer has considered available information about the future, the possible outcomes of events and the changes in conditions affecting the municipality.

The COVID-19 pandemic also had an impact on the City's financial performance due to businesses and households being affected by the restrictions introduced by the COVID-19 regulations issued as part of the National State of Disaster. The impact therefore resulted in lower than expected collections from consumers. Although improvement in collections can be observed subsequent to year end, the effect on collections can be expected into the coming financial year.

Key financial ratios of the City are closely monitored to ensure that the municipality remains able to pay its creditors in the short-term and also able to settle its obligations in the medium to long-term. Based on management assessment of Cash flow projections the municipality is still able to meet its financial demands and remains financially sustainable.

Strict credit control measures and monitoring of the payment levels of debtors are also factors that are being closely managed. The most significant of these are that the accounting officer continues to monitor and manage the expenditure levels and cash flow projections.

| Liquidity and solvability ratios | | | | |
|---|--------|---------|---------|----------|
| Current ratio (current assets vs current liabilities) | 0.91:1 | 1.24: 1 | 0.87: 1 | 1.11 : 1 |
| Acid ratio (current assets less inventory vs current liabilities) | 0.85:1 | 1.17:1 | 0.80:1 | 1.03 : 1 |
| Solvability ratio (total assets vs total liabilities) | 1.86:1 | 2.05:1 | 1.68:1 | 1.88 : 1 |
| Gearing ratio (total long-term debt to total revenue less grants) | 40.99% | 39.11 % | 32.98% | 43.08% |
| Debtors collection rate (%) | 80,00 | 88,00 | 80,00 | 88,00 |
| Cash/cost coverage (months) | 0,01 | 0,07 | 0.01 % | 0.07 % |
| Liquidity ratio (cash and cash equivalents vs current liabilities) | 0,08 | 0,42 | 0,07 | 0,41 |
| Net debtor days | 87.00 | 69.00 | 87.00 | 65.00 |

Consolidated Annual Financial Statements for the year ended 30 June 2020

Notes to the Consolidated Annual Financial Statements

| | Group | | icipality |
|------|-------------------|------|-------------------|
| 2020 | 2019 Restated* | 2020 | 2019 Restated* |

60. Going concern (continued)

The current ratio, acid test and cost coverage ratio shows a decline as compared to the previous financial year. This is partly reflective of the impact of COVID-19, however the municipality has been able to continue with payments to creditors and third party payments in the ordinary course of business. Similarly, the debtors management ratios (net debtors days and debtors collection rate) have declined and indicate lower payment levels. The City's solvency shows a reflects a decrease from the previous year, however the ratio is positive and reflects that the City's is still able to settle its liabilities.

The City has been implementing a Financial Sustainability Plan (FSP) which was approved by council in the 2017/18 financial year. The FSP is a positive tool which aims to assist the City of Tshwane to manage and monitor performance with regards to its financial standing. Subsequent to year end, this plan is being revised to take into account the effects of COVID-19 and its impact on various functions and operations of the City.

Credit rating and outlook

An annual rating action by Moody's Investors Service was issued on 1 April 2020 which saw the City's outlook revised from stable to negative, the Baseline Credit Assessment (BCA) was affirmed

and maintained as a rating of ba1 and the long term Global Scale Ratings (GSR) as Ba1.

Per the rating action, the affirmation of City's Ba1 rating by Moody's reflected the improvement made in the liquidity profile as well as the declining debt levels. The cash and cash equivalents balance showed an improvement from 2018 to 2019, while debt levels to operating revenue declined in 2019.

Post the reporting date,30 June 2020, Moody's downgraded the City's long-term credit rating by one notch from Aa2.za to Aa3.za, leaving the short term rating at the highest rating of P-1.za. The new long-term rating is in the upper echelon of investment grade which means that the City maintains a very strong ability to meet its short and long term debt obligations.

Based on the above analysis, the City of Tshwane is still considered to be a going concern and thus prepares its annual financial statements accordingly.

61. Events after the reporting date

2019/2020 Adjusting event Setting aside of decision to place the City of Tshwane Metropolitan Municipality under Administration

Consolidated Annual Financial Statements for the year ended 30 June 2020

| 2020 | 2019 Restated* | 2020 | 2019 Restated* |

61. Events after the reporting date (continued)

On the 6th of March 2020, the Gauteng Provincial Executive Council resolved to intervene in terms of section 139(1)(c) of the constitution of the Republic of South Africa in the Tshwane Metropolitan Municipality by dissolving the council. Formal notice of dissolution was sent to the Tshwane Metropolitan Municipality and the Provincial Executive Council appointed a multidisciplinary administration team (announced formally on 23 March 2020). The team assumed the duties of the dissolved Council on the effective date of the dissolution as envisaged in section 139(1) of the Constitution of the Republic of South Africa.

On 27 October 2020, post reporting date of 30 June 2020, the Supreme Court of Appeal (SCA) ruled that the decision to dissolve the City of Tshwane Metropolitan Municipality Council should be set aside pending the outcome of the Constitutional Court case. An amount of R21 069 249 has been provided for in the current year financial statement related to the salaries for Councillors.

Non-adjusting events

Appointment of Executive Mayor

On 30 October 2020, post reporting date, Randall Williams was elected as Executive Mayor for the City of Tshwane Metropolitan Municipality. The appointment comes after the Supreme Court of Appeal (SCA) judgement ruled to set aside the decision from March 2020 to place the City under Administration and dissolve its Council

Setting aside of decision to place the City of Tshwane Metropolitan Municipality under Administration

On the 6th of March 2020, the Gauteng Provincial Executive Council resolved to intervene in terms of section 139(1)(c) of the constitution of the Republic of South Africa in the Tshwane Metropolitan Municipality by dissolving the council. Formal notice of dissolution was sent to the Tshwane Metropolitan Municipality and the Provincial Executive Council appointed a multidisciplinary administration team (announced formally on 23 March 2020). The team assumed the duties of the dissolved Council on the effective date of the dissolution as envisaged in section 139(1) of the Constitution of the Republic of South Africa.

On 27 October 2020, post reporting date of 30 June 2020, the Supreme Court of Appeal (SCA) ruled that the decision to dissolve the City of Tshwane Metropolitan Municipality Council should be set aside pending the outcome of the Constitutional Court case.

Tshwane Broadband Network

On 26 July 2019 the North Gauteng High Court set aside the Build, Operate and Transfer (BOT) contract for the Tshwane Broadband Network, including the tripartite agreement. The ruling was made with the City of Tshwane's costs, as well as the two Councils', to the three respondents. The court order indicated that tender number GICT 01 2014/15, for the provision of a municipal broadband network project of ARH which decision was communicated on 11 June 2015 in a letter dated 9 June 2015 including any purported amendment of such letter, is declared invalid and set aside.

The decision of the Municipal Court of the Tshwane Metropolitan Municipality, in its entirety to inter alia approve the terms and signoff of the build, operate and transfer agreement ("the BOT agreement") of the Tshwane Broadband Network of the City of Tshwane taken on 28 April 2016 was declared invalid and set aside. Furthermore, the decision to amend Clause 4.1 of the BOT agreement which was subsequently entered into between the City of Tshwane and Thobela on 25 May 2016, the effect of which was to extend the period provided for the fulfillment of the suspensive conditions alternatively, their purported waiver of such conditions was declared unlawful and set aside.

On 24 August 2020, the Supreme Court of Appeal heard the case for appeal against the setting aside of the BOT contract. Judgement was handed down on 5 October 2020 where the appeal was upheld with costs for the two counsel. Furthermore, the order of the court was set aside and replaced with "the application is dismissed with cost including those of two counsel".

Resignation of Acting City Manager

On the 6th of March 2020, the Gauteng Provincial Executive Council resolved to intervene in terms of section 139(1)(c) of the constitution of the Republic of South Africa in the Tshwane Metropolitan Municipality by dissolving the council. Formal notice of dissolution was sent to the Tshwane Metropolitan Municipality and the Provincial Executive Council formally announced a team of administrators on 23 March 2020 with Mr. Mpho Nawa as Lead Administrator and Mr. Mavela Dlamini as the acting City Manager. The City Manager is the head of the administration as well as the accounting officer as defined by Section 15 of the Municipal Systems Amendment Act 2011 (Act 7 of 2011).

On the 6 July 2020 Mr. Mavela Dlamini resigned both as a member of the City of Tshwane administration team and the acting City Manager. Ms. Mmaseabata Mutlaneng has been duly appointed as the acting City Manager.

Contestation of the 2020/21 budget and valuation roll

In August 2020, two court applications were made regarding the City's 2020/21 Budget as approved by Administrators: Afriforum NPC On 24 August 2020, Afriforum NPC brought an urgent application to the high court whereby the legality of the approval of the 2020/21 budget by the Administrators is being contested.

|------|-------------------|--------------|-------------------|
| 2020 | 2019 Restated* | 2020 | 2019 Restated* |

61. Events after the reporting date (continued)

On 21 August 2020, Tshwane Money Matters Caucus and Alas! Tshwane brought an application to the High Court containing the following matters:

That the 2020 general valuation roll as approved be declared invalid and/or reviewed and set aside as being of no force or effect ab initio

That an interdict be granted to prohibit the City to charge and invoice property owners for property rates, and that accounts invoiced as from 1 July 2020 be reversed until a valid budget has been adopted.

The matters are ongoing, and no judgement has been issued yet.

Credit rating

Due to the impact on the City's financial position caused by the COVID-19 pandemic and resultant lockdown, Moody's downgraded the City's long-term credit rating in September 2020 by one notch from Aa2.za to Aa3.za. The short-term rating is still at the highest rating of P-1.za. The new long-term rating of Aa3.za is still in the upper echelon of investment grade which means that the City demonstrates strong credit worthiness and maintains a strong ability to meet its short- and long-term debt obligations.

Labour unrest

The City of Tshwane experienced widespread labour unrest from Tuesday, 21 July 2020 and for the week after. Some city assets were damaged in the process and services were interrupted as employees were not satisfied with the outcome of discussions between organized labour and the employer on the collective agreement of the benchmarked salaries.

The total estimated damages sustained by the City totals R448 724.66 predominantly on water meters in the inner city for R153 215 and R231 532 on intersection controllers, poles, panels, signal heads and power

The following revenue streams were impacted since the start of the protest: water meter connections to the value of R328 255, Rietvlei nature reserve: Entrance fees to the estimated value of R120 000. Transport services were more severely impacted with an estimated loss of revenue of R1 447 370 Tshwane Bus services. R2 708 753 for licensing services and R79 978 for Areyeng Fares.

During this period, the city suspended all bus and waste removal services to protect city assets. These vehicles were not allowed to leave the depots. Additional TMPD members were also deployed in order to safeguard assets

Benchmarking

On 01 August 2020, the City of Tshwane Metropolitan Municipality and The Independent Municipal and Allied Trade Union (IMATU) and The South African Municipal Workers union (SAMWU) signed an addendum to the settlement and collective agreement on the implementation of the basic salary structure benchmark report of the 18the November 2019.

The employer stated due to the change in financial position of the City following the lockdown period and COVID-19 pandemic but agreed that the money was payable based on the collective agreement.

A special meeting of the ADMINISTRATOR was held on 7 August 2020 where it was resolved that the collective agreement on benchmarking and the outstanding amount be implemented in two phases due to the financial challenges experienced by the City as outlined below:

Approval be granted to pay benchmarking for 2017/18 financial year on the 26 August 2020; and;

Approval be granted to pay the benchmarking for the 2018/19 financial year on the 26 February 2021 on condition that:

The city achieves a collection rate of at least 95% for the 6 months period to December 2020 as would be recorded and assessed in the mid-year assessment report.; and

ii. Should the city not achieve a 95% collection level as outlined above, that the employer and labour reopen discussions on how to implement the balance of the benchmarking;

Re-acquisition of the Tshwane Showgrounds

On 24 June 2020 a court order was issued containing a settlement agreement between the City of Tshwane and the Tshwane Business and Agricultural Corporation NPC (registered owner of the Tshwane Showgrounds). The settlement agreement was subject to approval of the Business Rescue Plan for the Tshwane Business and Agricultural Corporation NPC.

Post the reporting date (30 June 2020), the Business Rescue Plan was approved which gave effect to the settlement agreement. In terms of this settlement agreement, the City of Tshwane would pay an amount of R5.8 million to reacquire the showgrounds, take over all existing lease agreements and/or outstanding event contracts of Tshwane Business and Agricultural Corporation NPC. Furthermore upon transfer of the properties to its name, the City's claims (as creditor) against the Tshwane Business and Agricultural Corporation NPC would be deemed to be waived. The claims are estimated at R12.2 million, which will need to be written off with approval from Council.

Adjusting events

Irregular expenditure (Note 52):

In terms of the Admnistrator Resolution dated August 2020 an amount of R104 743 943 was written-off after investigations were concluded in terms of section 32 of the MFMA.

In terms of the Admnistrator Resolution dated October 2020 an amount of R339 582 028.04 was recommended to be recoverable

2018/19

Grants paid to municipal entities

The parent municipality transfers funds to municipal entities for their operations. On receipt of the funds, the entities treat the transfer as a refundable grant, hence they recognise revenue as they spend.

Housing Company Tshwane

The City of Tshwane paid over R84 695 953 (operational expenditure = R36 275 090 and capital expenditure = R48 420 863) in the year under review and HCT recognised R107 003 299 in its individual financial statements.

TEDA

The City of Tshwane paid R54 150 000 to TEDA in the year under review and TEDA recognised R54 150 000 in its individual financial statements.

63. Prior period restatements

Change in accounting policy

No change in accounting policy occurred during the year under review.

Reclassification

Reclassifications were done on various line items on the statement of financial performance to align the items to mSCOA classifications:

Correction of errors

The following material restatements are discussed below:

Statement of financial performance

Revenue:

Rental of facilities (R1 702 924 increase)
Interest received on outstanding consumer receivables (R759 651 increase)
Other income (R16 074 121 decrease)
Fair value adjustment (revenue) (R94 425 569 increase)
Fines, penalties and forfeits (R13 611 546 increase).

Expenditure line items:

Employee related cost R21 040 070 decrease)
Remuneration of councilors (R2 821 049 decrease)
Finance cost (R9 974 160 decrease)
Other materials (R404 732 541 increase)
Bulk purchases (R32 736 975 decrease)
Contracted services (R419 091 824 increase)
Transfers and subsidies (R33 709 003 increase)
Fair value adjustments (expense) (R8 198 182 increase)
General expense (R790 702 414 decrease).

Loss on fair valuing of redemption fund increased with R86 227 387 due to duplications that occurred in the calculations as at June

Statement of financial position

A reclassification was done between the different classes of fixed assets. This reclassification was necessary to align the asset classes with the mSCOA classifications. The effect of the reclassification is as follows:

Investment property (R96 917 081 increase) Property, plant and equipment (R398 359 405 increase) Intangible assets (R58 245 074 increase) Leased assets (R553 521 560 decrease).

A reclassification was done on the current portion of he employee benefit obligation after an error in the calculation of he current portion was picked up and the current portion was decreased with an amount of R159 288 093 and by implication the non-current portion was increased with the same amount.

Cash flow statement

No reclassification occurred during the year under review.

Correction of errors

Consolidated Annual Financial Statements for the year ended 30 June 2020

Notes to the Consolidated Annual Financial Statements

| | Group | | icipality |
|------|-------------------|------|-------------------|
| 2020 | 2019 Restated* | 2020 | 2019 Restated* |

63. Prior period restatements (continued)

The correction of errors has been done in terms of GRAP 3, Paragraph 44, and subject to Paragraph 45, whereby material prior period errors have been corrected retrospectively in the first set of financial statements authorised for issue after the discovery of the errors, by restating the comparative amounts for the prior period(s) presented in which the error occurred, or if the error occurred before the earliest prior period presented, restating the opening balances of assets, liabilities and net assets for the earliest prior period presented.

The financial statements presented in 2017/18 were restated in detail in accordance with GRAP 3; however to split the impact of the restatement on the 2016/17 financial year is impractical (GRAP 3 Paragraph 51 (b)), as it will result in a duplication because the nature of the error has already been addressed in full in the 2017/18 period.

The following material restatements are discussed below:

Revenue

Fines (AARTO) were increased with an amount of R5 590 275 (group = R5 590 275) due to late capturing of fines relating to the 2017/18 financial year.

Other income was increased with an amount of R6 343 492 (group = R6 342 092) due to certain journals of Wonderboom Airport not being processed in 2017/18, the A Re Yeng fare revenue received in advance was corrected and newly identified assets were also corrected. Further an amount of R1 400 was corrected on inter company transactions due to a restatement on related party transaction by TEDA.

Public contributions were decreased with an amount of R64 042 687 (group = R64 042 687) due to an error picked up in the calculation of the debtor for rezonings thate were done but not yet paid for.

Rental of facilities and equipment was increased with an amount of R4 620 492 (group = R4 620 492) due to certain journals of Wonderboom Airport not being processed in 2017/18.

Fair value adjustment were increased with an amount of R104 089 (group = R104 089) due to corrections on the air value of interest rate swaps.

Government grants and subsidies were increased with an amount of R15 496 386 (group =R17 984 997) due to the Tshwane Rapid Transit subsidy for 2017/18 which was received in July 2018 and a debtor was not created for this amount in the 2017/18 financial year. Housing Company Tshwane restated grants with an amount of R2 488 611.

Remuneration was increased with an amount of R40 618 697 (group = R40 618 697) due to correction of errors in the previous financial years on overtime entries and the accrual for accumulated leave.

Depreciation and amortisation were increased with an amount of R126 175 802 (group = R126 198 494) as a result of errors picked up in the calculations of the 2017/18 financial year. Housing Company Tshwane restated depreciation with an amount of R22 692.

Finance cost was increased with an amount of R28 008 562 (group = R27 939 079) due to the correction of errors in the calculation of leases.

General expense was decreased with an amount of R98 751 116 (group = R98 683 033) due to errors picked up during the VAT audit as well as errors picked up in lease calculation. Inter company transactions were restated with an amount of R1 400.

Other materials were decreased with an amount of R223 166 (group = R35 534) due to corrections on the EPWP initiatives basic salary.

Bulk purchases (of water) was decreased with an amount of R3 172 908 (group = R3 172 908) due to corrections made in the bulk water inventory of 2017/18.

Loss on redemption fund was increased with R2 112 296 (group = R2 112 296) due to corrections on the redemption fund calculations of 2017/18.

Fair value adjustments of the interest rate swap liabilities were decreased with R101 057 970 (group = R101 057 970) due to the duplication of interest rate swaps between the normal swaps and the redemption fund swaps.

Statement of financial position:

|------|---------------------|--------------|-------------------|--|
| 2020 | 0 2019 Restated* | 2020 | 2019 Restated* | |

63. Prior period restatements (continued)

Inventories were increased with an amount of R5 668 518 due to corrections in the bulk water inventory and the A re Yeng bus ticket inventory.

Other receivables were decreased with a net amount of R259 586 063 (group = R259 538 683) as a result of late capturing of fines relating to the 2017/18 financial year as well as certain journals of Wonderboom Airport not being captured in 2017/18 and corrections on overtime which affect the clearing accounts of payroll. Further, assets capitalised from a prepayment made to Sanral to the value of R61.125 million was restated to 2015/16 and the gain/(loss) on transfer of functions were restated with an amount of R191 677 318 due to the write-off of irreconcilable differences after take-on. Housing Company Tshwane restated debt impairment with R47 380 which by implication also affects the balance of other receivables.

Property, plant and equipment increased with an amount of R247 354 919 (group = RR249 820 837) due to a correction on the depreciation of rehabilitation assets of 2017/18 and other corrections due to the purification of he fixed asset register. Housing Company Tshwane restated property, plant and equipment with a net amount of R2 465 918.

Investment property decreased with an amount of R70 028 431 (group = R70 028 431) due to purification of the fixed asset register.

Intangible assets were increased with an amount of R7 862 614 (group = R7 862 614) mainly due to two reasons, namely newly identified assets that were brought onto the asset register and the capitalisation of assets acquired to the correct accounting period.

Trade payables were decreased with an amount of R38 814 031 (group = R38 184 027) due to the correction of the accrual of expenditure due to the late receipt of invoices as well as the restatement of the accumulated leave accrual.

Lease liability was increased with a net amount of R406 985 761 (current portion = R118 218 617 and non-current portion = R288 767 114) due to errors picked up in the calculations and information which relate to prior years that was received only now. The municipal entities do not have any finance leases.

VAT payable was decreased with an amount of R7 002 153 (group = R7 002 153) due to the VAT audit.

The interest rate swaps liabilities were decreased with R101 162 058 (group = R101 162 058) due to the duplication of interest rate swaps between the normal swaps and the redemption fund swaps.

For the City, the accumulated surplus was increased with a net amount of R2 368 2195 consisting of an increase in the surplus of 2017/18 of R55 192 912, a decrease in the surplus of 2016/17 of R65 022 379 and an increase in the surplus of 2015/16 and prior of R12 197 686.

For the group, the accumulated surplus was increased with a net amount of R4 881 517 consisting of an increase in the surplus of 2017/18 of R57 706 220, a decrease in the surplus of 2016/17 of R65 022 379 and an increase in the surplus 2015/16 of R12 197 685 as Housing Company Tshwane restated 2017/18 with an amount of R2 513 310.

Restatement on disclosure notes

Note 59 - Contingencies

Under the litigation cases a restatement was done R12 150 000 decrease) in the value of a case of the Human Settlement Department as the value was previously incorrectly disclosed as R14 100 000 instead of R1 950 000.

Note 65 - Operating leases

The total operating lease payment was restated with an amount of R70 756 from R4 005 783 to R3 935 027 due to errors picked up in the calculations. The reconciliation - machinery disclosure was restated in total with an amount of R1 178 881 from R24 958 652 to R26 137 533.

Note 57- Regulation 45:

The value of awards to family members of a person in the service of the state were restated from R66 424 902 to R13 984 436 as the accounting treatment was not correct because in the prior year the expenditure was disclosed and not the awards.

Presented below are the prior period restatements contained in the surplus for the year, the statement of financial position and the cash flow statement.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Notes to the Consolidated Annual Financial Statements

| | Group | Mun | icipality |
|------|------------------------|-----|-------------------|
| 2020 | 2020 2019 Restated* | | 2019 Restated* |

63. Prior period restatements (continued)

Reasons for restatements for statements of financial performance

Revenue

Service charges

Service charges increased due to correction of solid waste removal journal incorrectly captured by the in the previous financial year

Rental facilities

Correction of the calculations of the straight lining of rental income pertaining to Wonderboom Airport, the Market and other City properties.

Other income

Recognition of other income due to savings realised as a result of the VAT audit, these savings relating to expenses where Input VAT was not claimed.

Expenses:

Employee related costs

Employee costs increased as a results of restatements of overtime, acting allowance and other costs paid in the 2019/20 financial year relating to expenditure incurred in previous periods.

Depreciation and amortisation

Depreciation increased due to increase in PPE due to the purification project embarked on by the city to ensure that the fixed asset register is fully GRAP compliant. Furthermore, the increase is also attributable to the net impact of AUC capitalisation that had to be restated to prior year's amounts

Contracted services

Increase in contracted services is due to payment of contract price adjustments relating to previous financial year(s).

Loss on disposal of assets and liabilities

Loss on disposal of assets and liabilities changed due to corrections made in calculations of the previous year.

General expenses

General expenses increased due to various expense due to invoices submitted after cut-off dates.

Reasons for restatements for statements of financial position

Assets

Other receivables form non-exchange transactions

Other receivables from non-exchange increased due the VAT calculation resulting from the Land Swap Agreement - Hammanskraal BPO only processed in 2019/20.

Other receivables form exchange transactions

Increase in receivables from exchange due correction of the calculations of the straight lining of rental income pertaining to Wonderboom Airport, the market and other City properties.

Property, plant and equipment

Property, plant and equipment increased with an amount of R2 082 607 577 due to the purification project embarked on by the city to ensure that the fixed asset register is fully GRAP compliant. There was also an amount of R439 432 446 expensed from assets under construction, since this amount was for payment of operational expenditure and not capital in nature. The decrease of R84 200 980 relate to a correction on the WIFI project which was incorrectly capitalised in previous years. In the 2018/2019 year the Denneboom Service Concession was also overstated due to estimates made based on AGSA audit finding.

Investment properties

Investment properties increased with an amount due to purification of the fixed asset register.

Leased assets

An incorrect lease term was used to calculate the present value of the lease liability. Changes on the lease terms used previously as shared services only provided this information in the current year hence the restatement.

63. Prior period restatements (continued)

Intangible assets

Intangible assets were increased mainly due to two reasons, namely newly identified servitudes that were brought onto the asset register and the capitalisation of assets acquired to the correct accounting period.

Lease liabilities

An incorrect lease term was used to calculate the present value of the lease liability. Changes on the lease terms used previously as shared services only provided this information in the current year hence the restatement.

Payables from exchange transactions

Trade payables were increased due to the correction of the accrual of expenditure due to the late receipt of invoices as well as the restatement of the accumulated leave accrual.

VAT pavable

Vat payable decreased as a result for VAT audit and VAT calculation resulting from the Land Swap Agreement - Hammanskraal BPO only processed in 2019/20.

Housing company Tshwane

Disclosure note

During the previous financial year 20/19, the cost and accumulated depriciation of motor vehicle was omitted on note 3 due to the software failure. The disclosure was corrected in the current financial year but had no impact on the closing balance for motor vehicle. the lease rental on operating lease was also not disclosed in the prior period and management corrected the disclosure under note 5 in the separate financial statements.

| | Cost previously reported | Corrected cost | Corrected accumulated depreciation | Total |

The Municipality made the following in-kind- donations and assistance during the 2019/20 financial year:

The Emergency Services Department provided the following assistance to various organisation

| Description | Amount |
|----------------------------|---------|
| Ambulance standby services | 932 960 |
| *Relief items | 404 128 |
| Fire and rescue services | 57 163 |

2018/19:

The City received the following in-kind donations and assistance during the 2018/19 financial year:

Emergency Services:

- # One 55 inch digital TV from Skyworth to the value of R6 999
- # Two soccer balls and 20 water bottles from Assupol to the value of R780
- # Nine draw string bags to the value of R585
- # Nine conference folders to the value of R1 540
- # 200 personal alarms to the value of R30 000
- # 150 conference bags to the value of R5 100
- # 10 cocktail mixers to the value of R2 875.

Metro Police:

Scholar patrol equipment to the value of R40 000 from the Gauteng Department of Community Safety.

Health Services:

- # Health promotion TB leaflets to the value of R2 180 from Creative Harvest
- # A mobile clinic/trailer and double cab bakkie to the value of R976 944 by PPC)
- # Two mobile units/trailers fully equipped with medical equipment to the value of R1 953 888 by PPC.

The City distributed the following in-kind donations and assistance during the 2018/19 financial year:

Emergency Services:

64. In-kind donations and assistance (continued)

- # The Disaster Risk Mananement Section of the Business Operations Division provided blankets and mattresses as well as plastic sheets and tents to various informal settlements to the value of R259 266
- # Free quotations to the value of R465 340
- # Assistance from Emergency Medical Operations amounting to R153 184.

65. Operating leases

The group leases premises (buildings and parking) from various property owners for terms that range from three to five years with fixed annual escalation that range from 8% to 10%. The group has the option to extend the agreement for periods that range between one month and three years.

Non-cancellable operating leases- office equipment: Municipality

The City is leasing office equipment for a period of three years from various service providers in accordance with the National Treasury Transversal contract- RT3-2015.

The City of Tshwane, may at its sole discretion extend this Agreement for a maximum period of 24 (twenty four) months on the same terms and conditions, except for the rental which shall be reduced by 75% (seventy five percent) of the rental specified therein.

67. Change in estimate

Property, plant and equipment

The useful lives and residual value of all asset classes was reviewed and adjusted during 2019/20 to more accurately reflect the period of economic benefits or service potential derived from these assets. Refer to note 10 under property, plant and equipment for a discussion on the basis on which the review of useful lives was done. Residual values of all asset classes after review was changed to zero due to the fact that the City uses it assets for its entire economic life.

The effect of changing the remaining useful lives during 2019/20 has decreased the depreciation charge for the current and future periods. The total number of assets affected was 1 421 532.

TEDA:

During 2018/19 TEDA reviewed the useful life of its assets using the indicator-approach. Motor vehicles were reviewed, and the useful life was increased to seven years.

Housing Company Tshwane (HCT):

During 2018/19 HCT reviewed the useful life of its other fixed assets as well as furniture and fittings and revised it from 10 to 15 years and from 15 to 18 years respectively. The effect of this revision has decreased the depreciation charges for the current and future periods by R72 696.50.

Water is supplied to Tshwane from Rand Water, Magalies and the City's own water sources. Monthly meter readings of the supply are used to monitor the total gross supply. Monthly meter readings of water exported to the neighbouring municipalities are used to calculate the net water input into the city.

Water-loss is monitored, managed and controlled by the implementation of the Water Conservation and Water Demand Management strategies. The primary outcome of these strategies is to reduce -

- * Technical losses (where not all water supplied reached the consumer); and
- * Non-technical losses (where not all water reaching the consumer is paid for).

These losses are caused by -

- real losses (physical loss of water from the system); and
- apparent losses (losses due to meter inaccuracies, meter estimations, non-metering of water and unauthorised consumption this is water consumed but not properly measured, accounted and paid for).

From the above, water loss in the city is determined by calculating the amount of NRW, which is the difference between the volume of water supplied into the system and the authorised consumption.

Activities undertaken by the Water and Sanitation Division involve the continuous investigation of various factors that lead to water loss and the implementation of various initiatives to assist with the reduction of NRW. These investigations with subsequent mini projects are often cross-region initiatives where work performed in one region directly affects other regions. The initiatives include the following:

- * Improve on leak repair responsiveness (active and passive) to reduce wastage
- * Metering: Installation of water meters at unmetered houses, Meter audits to improve information on billing system, Replacement of old and or damaged meters to increase accuracy of meter readings
- * Installation of pressure management systems to reduce high pressure and lower leakage
- Pipe network replacements in areas with worn out network pipes
- Restriction of water supply to non-payong customers

For the 2019./20 financial year the NRW in Tshwane was calculated at 109 141 129 kl (30,2% of the total input into the system). This indicates a deterioration of NRW in the city when compared to June 2019 when the NRW was 112 430 574 kl (29.81% of the total input into the system). The losses in rand-value amount to R 988 884 109 (2019 = R 1 051 432 369). The calculation is based on the unit tariff of Rand Water purchases per kilolitre at R10.14 for 2019/20 and R9.351 837 for 2018/19.

For the 2018/19 financial year the NRW in Tshwane was calculated at 112 430 574 kl (29.81% of the total input into the system). This indicates a deterioration of NRW in the city when compared to June 2018 when the NRW was 88 703 199 kl (27.89% of the total input into the system). The losses in rand-value amount to R1 051 432 369 (2018 = R739 338 528). The calculation is based on the unit tariff of Rand Water purchases per kilolitre at R9.351837 for 2018/19 and R8.334970 for 2017/18.

2019/20:

The annual electricity distribution losses are made up of internal use (Streetlights and own use), technical and non-technical losses which are the difference between electricity purchased and electricity sold to the end user at differentiated tariffs levels. The City purchases its 100% electricity from ESKOM at transmission and distribution levels, 85% is purchased through the 3 infeed stations (Njala, Kwagga and Reitvel) at 175kV transmission levels and 15% at distribution levels.

For the period under review, the department implemented the following initiatives to reduce the non-technical loses:

Initiatives to reduce technical loses include:

The electricity distribution loss is calculated at 20 090 099 481 kWh (22.31 % of the total electricity bulk purchases).

Technical losses are results of electricity losses while being distributed from the source of generation through transmission and distribution network to the final consumer. The wires (copper or aluminum) being used to distribute electricity has certain resistance which resist the throughput of current, as a results there is certain portion of electricity that is lost due to distribution and it is termed technical losses. The NERSA acceptable figure for network like Tshwane is estimated to be 7% (655 819 624 KWh), accounting for 31% (611 748 546 ZAR) of the total Distribution losses. However, the national utilities benchmark is for the technical Losses to be between 3-6%.

Non-technical losses, which for the period under review is 12.74% (1 193 588 161 kWh), accounting for 57% of the total distribution losses (1 113 379 037 ZAR) are amongst others the result of administrative and technical errors, high estimates, negligence, theft of electricity, tampering with meters and connections which form part of illegal consumption.

Non-Revenue Losses (Streetlights and Internal Use) accounted for 2.57% (240 691 696 kWh) of the total losses and accounting for 12% (224 517 214 ZAR) of the total distribution losses.

Streetlights and internal Use) has been reclassified as non-revenue to ensure that the total distribution loses is accurately presented. In the prior year the streetlights and internal use were presented as revenue loss and not as electricity loses.

2018/19:

The electricity distribution loss for the 2018/19 financial year is calculated at 1 766 005 970 kWh (18.28 % of the total electricity bulk purchases). The annual electricity distribution losses consists of technical and non-technical losses which means the difference between electricity purchased and electricity sold.

70. Budget differences

Material differences between budget and actual amounts (municipality only)

190

^{*}Remove of illegal connections

^{*}Meter audits and normalize of stuck meters

^{*}Normalization of prepaid meters that are on low buying electricity

^{*}Installation of tamper boxes in hot spots with high level of illegal connections

^{*}Electrification for all programmes

^{*}Refurbishing and replacing old equipment in the network

^{*}Strengthening over-headlines

^{*} See Note 63

Consolidated Annual Financial Statements for the year ended 30 June 2020

Notes to the Consolidated Annual Financial Statements

| | Group | Municipality | / |
|------|---------------------|--------------|-------------------|
| 2020 | 0 2019 Restated* | 2020 | 2019 Restated* |

70. Budget differences (continued)

It is general practice to deem a 10% deviation on operational revenue and expenditure versus the final budget as material. For capital expenditure, the percentage deviation is 5%.

2019/20 financial year

The following revenue and expenditure line items showed a material variance for the year ending 30 June 2019 against the adjustments budget:

Other own revenue categories:

Revenue:

Service Charges category: (11% under)

- Under recovery on electricity mainly results from the challenges experienced regarding the replacement of smart meters and due to low consumption during lockdown.
- Under recovery on water is mainly on water fees and connection fees, revenue was less than projected. The budget for water is based on statistical trends and is driven by demand.

Investment revenue category: (20 % over)

- The variance between the budgeted and the actual figure was cause by the interest received mainly on the redemption fund investments vehicles.
- The City received slightly more interest on interest rate swaps because when the interest rate decline in the market, the city
 received higher interest on swaps than what is expected.
- The interest received on Bonds and FFO security was not affected by the current economic conditions because they are on fixed rate.
- The City made contribution of 310 million to the redemption fund during the previous financial year which also contributed to higher return on investments in the redemption fund

own revenue category: (10 % under)

- Rental of Facilities and Equipment unfavourable is due Rental Stands due to the expiry of lease agreements and illegal
 occupation.
- Interest Earned on Outstanding Debtors unfavourable: Revenue was less than projected due to the suspension of interest charges
 - on Residential and Business debtors.
- Fines and Penalties unfavourable: Mainly on AARTO revenue. The revenue depends mainly on motorists infringing the traffic laws
 - and due to the lockdown there were fewer cars on the roads. Furthermore, Tshwane Metro Police Department members monitored
 - compliance with the COVID-19 regulations jointly with other security cluster members (SAPS and SANDF).
- Licenses and Permits: Revenue not collected due non-operations of licensing centres during lockdown. The operations resumed in June 2020.

Expenditure categories

Contracted Services category:

Mainly on the following line items:

Project-linked Housing: Underspending on projects funded by the Human Settlement Development Grant. The grant will not be
spent in full due to delays in supply chain management processes and the signing of service delivery agreements with the
Gauteng provincial government. Contractors have been appointed, a roll over will be requested.

Consolidated Annual Financial Statements for the year ended 30 June 2020

Notes to the Consolidated Annual Financial Statements

| | Group | | icipality |
|------|------------------------|--|-------------------|
| 2020 | 2020 2019 Restated* | | 2019 Restated* |

70. Budget differences (continued)

- Consultant: Civil Engineering: The service-level agreement for the Management Information Systems Project was approved in January 2020.
- Buildings: Due to a delay in the appointment of service providers.
- The project were not resumed as planned due to the delay signing the Service Level Agreement (SLA).

Remuneration of councillors (11% under)

- Due to the erratic changes in the members of the mayoral committee and councillors members
- · Resignation of councillors

Debt impairment

• Increase in debtors impairment is due to increase in debtors book

Loss on disposal of PPE

. Overspending mainly on scrapping of Assets.

Fair value adjustment

• Valuation in intererest rate swaps not budgeted for.

Capital expenditure:

 The capital expenditure shows a 81.% spending level against the total budget for the financial as various capital projects were affected by the lockdown.

The special adjustment budget

The special adjustment budget was approved by Administrator on 15 June 2020.

In terms of the annexure to MFMA Circular No.99, a special adjustments budget dealing with all COVID-19 related expenditure must be approved by 15 June 2020.

The administration team at its meeting of 7 May 2020 approved a report of the reprioritisation of the budget in response to COVID-19.

The Council approved the 2019/20 Original Revenue Budget to the amount of R35 465 848 437 which was increased with R228 800 815 to R35 694 649 252 (increase of 0.64 %). Furthermore, the total expenditure of R35 446 239 018 was increased with an amount of R228 800 815 to R35 675 039 834(increase of 0.64%). As a result the budgeted surplus (before capital transfers) amounts to R19 609 419.

The original capital budget was approved for an amount of R4 248 464 401. During the special adjustment budget process the capital

budget decreased with an amount of R 514,7 million and the final capital budget for 2019/20 amounts to R3 733 767 614 due to a

reprioritisation of USDG and PTIS grants.

71. Accounting by principals and agents

The City is a party to a principal-agent arrangement(s).

Details of the arrangment(s) is are as follows:

Gauteng Department of roads and transport

The agreement requires the city to perform all the registering and testing function on behalf of the department which consist of motor vehicle registration and licensing. driving licence test centre functions and vehicle test station functions. The city is an agent to the agreement as they are only entitled to commission amount and deposits all the net amount received for services rendered to the provincial department. The City's failure to deposit amount collected to the province for a period of two months results to strict requirement of depositing daily to the department

CoT as agent and GDRT as a principal

Revenue recognised

The aggregate amount of revenue that the entity recognised as compensation for the transactions carried out on behalf of the principal is 163 123 599 (2019: 194 555 278).

The resource and/or cost implications for the entity if the principal-agent arrangement is terminated, are [State information/discussion].

[Provide additional info as appropriate]

72. Public private partnerships

Tshwane House

The City of Tshwane has entered into a public-private partnership agreement with Tsela Tshweu (the Consortium), a private Consortium led by Group 5, to finance, construct and operate the City of Tshwane's head office. The agreement is for a period of 27 years of which two years were for the construction of the property and 25 years are to operate the property on behalf of the City of Tshwane. At the end of the 27 year agreement ownership of the building will pass to the City of Tshwane. The agreement is in the third year of the operational stage. Occupation took place in June 2017.

Fleet vehicles and fleet related services

The City of Tshwane has entered into a public-private partnership agreement with the following:

- * Moipone Group of Companies (Pty) Ltd for the supply of Category A and C fleet vehicles and fleet-related services;
- * Fleet Africa, a division of Super Group Africa (Pty) Ltd, for the supply of Category E fleet vehicles and fleet-related services; and
- * Fleetmatics VMS (Pty) Ltd for the supply of Category B fleet vehicles and fleet-related services.

The agreement is for a period of five years from the commencement date where after it will automatically terminate. The City may extend the agreement on written notice which shall be given at least 90 days before the termination date.

During the lifetime of the agreement the City will make unitary payments to the private party in accordance with the provisions of the payment mechanism. The unitary payments will be the amount payable with respect to the leased vehicles, monthly in arrears.

The city has restructured the finance lease for some vehicles leased from Talis and Supergroup. The restructuring will result in the City retaining ownership of the vehicles at the end of the lease term.

Denneboom Service concession

The City of Tshwane Metropolitan Municipality entered into a service concession and Lease Agreement with the Concessionaire Interdent Management Services (Pty) Ltd. This constitute a Public-private partnership, reference on note 23 Service concession arrangements. "

Consolidated Annual Financial Statements for the year ended 30 June 2020

Notes to the Consolidated Annual Financial Statements

| | Group | | icipality |
|------|------------------------|--|-------------------|
| 2020 | 2020 2019 Restated* | | 2019 Restated* |

73. Financial instruments disclosure (continued)

Disclosure note amounts compared to financial instruments disclosure and financial instruments: risks involved disclosure

The disclosure in Note 74 and note 75 will differ from what is disclosed in the statement of financial position due to the definitions and requirements of GRAP 104 as not all line items on the statement of financial position constitute a financial instrument in accordance with the definitions of GRAP 104. For example consumer receivables, other receivables and payables from exchange transactions consist of items that do not meet the definition of a financial instrument and these items are therefore excluded in the aforementioned notes.

74. Financial instruments: Risks involved

Risks

In running its operations the city is exposed to variety of financial risks: market, liquidity, credit and interest rate risks.

62.(1)(c)(i) Of MFMA states that the Accounting Officer of a municipality is responsible for managing the financial administration of

the municipality, and must for this purpose take all reasonable steps to ensure that the municipality has and maintains effective.

efficients, efficient and transparent systems of financial and risk management and internal control in response to this the City adopted National

Treasury Public Sector Risk Management Framework and is committed to the effective management of the risks. The process is

called risk monitoring and control. It involves monitoring the identified risks including the above mentioned financial risks, identifying

new risks, and evaluating the overall effectiveness of the risk management plan in reducing the risks.

The Group Financial Services is committed to the effective management of the financial risks, with Treasury office responsible for

management of market, liquidity, and interest rate risks. The Revenue office is responsible for credit risk management.In the course

of the municipality's business operations it is exposed to interest rate, credit, liquidity and market risk. The Municipality has developed a comprehensive risk management process to monitor and control these risks. The risk management process relating to

each of these risks is discussed under the headings below.

There was no change in the exposure to risks and how they arise since the previous financial year, with the exception for the impact

of the COVID-19 pandemic which also contributed towards the credit risk due to the effect that it had on consumers' ability to pay for

their municipality accounts. The objectives, policies and processes for managing the risk and the methods used to measure the risk

since the previous financial year remained the same.

Financing risk

Financing risk refers to the City's inability to control its monetary policy and defaulting on bonds or other debt issues. Borrowings could become more difficult or more costly in the future. The City's targeted weighted average cost of borrowing for the MTREF is set at 9.9% per annum and as per the June 2019 audited annual financial statements, the result was 9.9% meaning that the City is managing its cost of borrowing prudently.

Interest rate risk

Consolidated Annual Financial Statements for the year ended 30 June 2020

Notes to the Consolidated Annual Financial Statements

| Group | | Municipality | |
|-------|-------------------|--------------|-------------------|
| 2020 | 2019 Restated* | 2020 | 2019 Restated* |

74. Financial instruments: Risks involved (continued)

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will be negatively affected by the adverse changes in interest rates. Interest rate risk arises from the fluctuations in the economic market due to the economic climate. The Municipality manages its interest rate risk by maintaining an appropriate mix between fixed and floating interest rate borrowings and investments, as well as by entering into interest rate swap contracts on outstanding borrowings. The Municipality's exposure to interest rate risk and the effective interest rates on financial instruments at statement of financial position date are as follows:

The City has significant exposure to interest rate risk due to the volatility in South African interest rates, fluctuations in interest rates on bonds issued and short-term investment will impact the City's cash flow negatively. The municipality's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the municipality to cash flow interest rate risk. Borrowings issued at fixed rates expose the municipality to fair value interest rate risk. The Municipality's policy is to maintain approximately 60% of its borrowings in fixed rate instruments. Although the interest rate swap for the past 2 financial years showed an estimated net loss, it will average out over the long term as the interest rate swaps were taken up for periods ranging between 9 to 20 years.

Mitigation factors -

The City has adopted smoothing, maintaining a balance between fixed interest rates and floating interest rates on different instruments. The city also uses Interest rate swap to manage the risk –

Variable rate loans: R 8 097 074 967 (2019: R6 230 460 474) and

Fixed rate loans: R3 997 158 972 (2019: R5 339 769 946)

There was no change in the exposure to risks and how they arise since the previous financial year. There was further no change in the objectives, policies and processes for managing the risks and the methods used to measure the risks.

Interest rate swaps

The group has entered into interest rate swap contracts that entitle it to receive interest at fixed or floating rates on notional principal amounts and that oblige it to pay interest at variable rates or fixed rates on the same amounts. The interest rate swaps allow the group to raise long-term borrowings at fixed rates or floating rates and effectively swap them into variable rates or fixed rates in terms of the structured finance contractual requirements.

The estimated fair value gain/(loss) indicated below was determined by comparing the interest rate swap contracted values (fixed rate) to the variable rate paid.

At the reporting date the group had entered into the following interest rate swaps related to specific statement of financial position items:

Redemption fund

The redemption fund is a financial solution to assist the City of Tshwane to meet its financial obligations to repay previously issued bonds. The Group made use of the service of a third party fund manager for two thirds of the 2018/19 financial year. However the strategy that was adopted and approved by the City of Tshwane still remains in force for its intended duration without any deviation. The City of Tshwane pays contributions into the fund so as to enable the Municipality to receive contributions plus growth to repay redemptions of bonds when they fall due. This is part of the risk management framework adopted by the City of Tshwane. The financial liabilities of the fund are disclosed in Note 7.

74. Financial instruments: Risks involved (continued)

Currency risk

The Municipality undertakes certain transactions that are denominated in foreign currencies, hence exposures to exchange rate fluctuations might arise. However, the group manages this risk by entering into contracts where the risk is carried by the service provider. The City experiences currency risk predominantly as a result of one contract entered into by the City, as a result of timing differences between the date of invoice and date of payment.

Credit rating

As an issuer of long and short term debt instruments to banks and institutional investors in the debt capital market, the City has to undergo independent credit rating assessments, to determine its creditworthiness and its financial ability to make more debt issuances and to repay them. The City has appointed Moody's Investors Service, an approved credit rating agency to perform credit rating assignments on the City's credit profile and to issue credit rating opinions, in terms of the Financial Sector Conduct Authority regulations.

During the financial year under review (2019/20), an annual rating action by Moody's Investors Service was issued on 1 April 2020. Although the outlook of the City was revised by Moody's from stable to negative, the Baseline Credit Assessment (BCA) was affirmed and maintained as a rating of ba1 and the long term Global Scale Ratings (GSR) as Ba1

Per the rating action, the affirmation of City's Ba1 rating by Moody's reflected the improvement made in the liquidity profile as well as the declining debt levels. The cash and cash equivalents balance improved from ZAR3.4 billion in 2018 to ZAR4.8 billion in 2019, while debt levels to operating revenue declined to 32% in 2019 from 34% in 2018 and the city projects its debt levels to further decline in the next three years. The city also posted an improved gross operating balance to operating revenue of 8.5% in 2019 from 7.4% in 2018. The City has a flexible debt structure which consists of 20% bullet bonds maturing in 2023 and 2028 respectively which are covered by sinking fund investments while 80% of the total debt consist of amortising debt profiles.

Subsequent to year end, Moody's issued another rating in September 2020.

Credit risk

The risk that one party to a financial instrument will cause a financial loss for the other party by defaulting. The defaulting Consumer receivables on exchange transactions exposes the City to credit risk. The credit risk is very limited due to the nature of the municipality's business and its reliance on government grant as the main source of security funding. The city has Credit Control and Debt Collection Policies to manage the exposure to risk as a result of defaulting customers. Credit control is those managerial, administration and accounting policies the City applies to keep the exposure at a sustainable level while Debt collection is the actual remedies the City takes to enforce the collection of the amounts due and payable to the municipality.

Financial assets, which potentially subject the Municipality to the risk of non-performance by counter-parties and thereby subject the Municipality to concentrations of credit risk, consist mainly of trade receivables. Credit risk is controlled through the application of a credit control policy and monitoring procedures. Where necessary, the Municipality obtains appropriate deposits and guarantees from debtors to mitigate risk. The Municipality's cash and cash equivalents and short-term deposits are placed with high-credit quality financial institutions.

The Municipality limits its treasury counter-party exposure arising from the money market by only dealing with well-established financial institutions confirmed by the rating agency appointed by the Chief Financial Officer. The Municipality only deals with financial institutions with a short-term credit rating of A+ and long-term credit rating of AA- and higher at an international accredited credit rating agency. The Municipality's exposure is continuously monitored and the aggregate value of transactions concluded is spread amongst different types of approved investments and institutions.

Credit risk with respect to trade receivables is limited due to the large number of customers comprising the Municipality's customerbase and their dispersion across different industries and geographical areas. The Municipality does not have any significant exposure to any individual customer or counter-party. Accordingly, the Municipality does not consider there to be any significant concentration of credit risk, which has not been adequately provided for. Trade receivables are presented net of the allowance for impairment. The consumer receivables as presented do not include any debt relating to property rates, as property rates do not meet the definition criteria for financial instruments. Strict credit control procedures are in place to mitigate the credit risk relating to trade receivables. Maximum exposure to credit risk: There has been no significant change during the financial year, or since the end of the financial year, to the municipality's exposure to credit risk, the approach tp measurement or the objectives, policies and processes for managing this risk. The carrying amount of financial assets recorded in the financial statements, which is net of impairment losses, represents the municipality's maximum exposure to credit risk without taking into account the value of any collateral obtained. The major concentrations of credit risk (as a percentage) that arise from the Municipality's receivables in relation to customer classification are as follows:

| National and provincial government | 7 | 4 |
| Other consumer receivables | 3 | 3 |
| Long-term receivables | 2 | 2 |
| Sundry receivables | 12 | 16 |
| | 100 | 100 |

Liquidity risk

The risk that the City may encounter difficulties in raising sufficient funds in meeting its obligations and commitments that are due and payable within 12 months. Availability of adequate resources to meet the City's obligations in the needs of its capital and operating expenditure, creditors at large including employees is critical for the city to continue as a going concern of which cannot be compromised. The Municipality manages liquidity risk through proper management of working capital, capital expenditure and monitoring of actual versus forecasted cash flows. Adequate reserves, liquid resources and unutilised borrowing facilities are also maintained. In terms of its borrowing requirements, the municipality ensures that adequate funds are available to meet its expected and unexpected financial commitments. In terms of its long-term liquidity risk, a reasonable balance is maintained between the period over which assets generate funds and the period over which the respective assets are funded. Capital expenditure, budgeted and forecast cash flow calculations are funded as follows from the capital market.

The maturity profile of the loans and bonds of the City are as follows:

| | June 2020 | June 2019 |
|--|--------------------|-------------------|
| Amounts payable within 1 year | R165,461,025.87 | R218,371,166.91 |
| Amounts payable between 2 and 5 years | R1,405,727,882.47 | R2,025,970,784.89 |
| Amounts payable between 6 and 10 years | R9,022,255,168.58 | R9,325,349,377.70 |
| Amounts payable within 11 and 20 years | R1,500,789,863.01 | |
| Total | R12.094,233,939.93 | R11,569,691,329 |

The City, through the Treasury office, manages this risk. The City established the redemption fund as a major safeguard towards therisk. The redemption fund is a financial solution to assist the City to meet its financial obligations. The fund was previously managed by a 3rd party of which this ceased as at February 2019 thus the fund is currently operated by a financial institution

Other mitigating factors -

The City has also adopted a Financial Sustainability Plan (FSP) in order to ensure that there is sufficient monitoring and mitigation of threats to financial sustainability with key focus on restructuring of the budget, implementing the revenue enhancement initiatives and commitment to stringent expenditure controls and cost containment particularly on non-essentials and non-revenue generating activities.

The municipality's risk to liquidity may result due to availability of funds to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments, credit facilities as well as monitoring of key financial indicators.

Cash flow forecasts are prepared to determine the City's cash needs and borrowing facilities are monitored closely.

Cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored

Market risk

The Group is exposed to fluctuating market prices inherent in the purchasing of electricity, water and coal used in the delivery of electricity and water services. The Group manages this risk by giving any price increases through to the consumers on an annual basis. An agreement has been entered into with both Eskom and Rand Water that tariff increases occur only once a year. Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of market factors. The cornerstones of market risks are currency risk, interest rate risk and price risk. Market risk cannot simply be eliminated through diversification, though it can be hedged against in other ways.

The group applies the following mitigation factors to market risk-:

The group investments are diversified amongst the well-established financial institutions. The City abides by National Treasury'sinvestment regulations and the City's Investment policy. Interest rate risk management: The Municipality's interest rate profile consists of fixed and floating rate loans and bank balances which expose the municipality to fair value interest rate risk and cash flow interest rate risk and can be summarised as follows:

Financial assets/liabilities:

Trade and other receivables/payables: At a fixed rate of interest. Management manages interest rate risk by negotiating beneficial rates on floating rate loans and where possible using fixed rate loans. Management also has a policy of balancing the interest on asset loans with the interest payable on liabilities.

Fair values

The Municipality's financial instruments consist mainly of cash and cash equivalents, trade receivables, investments, consumer payables, long-term debt and derivative instruments (interest rate swaps). No financial asset was carried at an amount in excess of its fair value and fair values could be reliably measured for all financial assets that are available-for-sale or held-for-trading. The following methods and assumptions are used to determine the fair value of each class of financial instrument.

Cash and cash equivalents

The carrying amount of cash and cash equivalents approximates fair value due to the relatively short-term maturity of these financial assets and financial liabilities.

Trade receivables (debtors)

The carrying amount of trade receivables, net of provision for impairment (provision for bad debt), approximates fair value due to the relatively short-term maturity of these financial assets

Investments

Investments are carried at their original cost in the statement of financial position, except for those where the interest received semi annually are capitalised. The fair value of publicly traded instruments is based on quoted market prices for those investments

Trade payables

The carrying amount of trade payables approximates fair value due to the relatively short-term maturity of this financial liability.

Interest-bearing borrowings

Subsequent to initial recognition, interest-bearing borrowings are stated at amortised cost with any difference between cost and redemption value being recognised in surplus or deficit over the period of the borrowings on an effective interest basis. The fair value of interest bearing borrowings with variable interest rates approximates their carrying amounts.

^{*} See Note 63

Capital risk management

The group's objectives when managing capital are to safeguard the group 's ability to continue as a going concern in order to maintain an optimal capital structure to reduce the cost of capital. The capital structure of the municipality consists of debt, which includes the borrowings (excluding derivative financial liabilities) disclosed in Note 19 and 20 and cash and cash equivalents disclosed in Note 9, and equity as disclosed in the statement of financial position.

Consistent with others in the industry, the municipality monitors capital on the basis of the gearing ratio. There are no externally imposed capital requirements. There have been no changes to what the municipality manages as capital, the strategy for capital maintenance or externally imposed capital requirements from the previous year. The gearing ratio at 30 June 2020 and 30 June 2019 respectively were as follows:

There are no externally imposed capital requirements.

The gearing ratio at 30 June 2020 and 30 June 2019 respectively:

| Total borrowings Finance lease obligation Loans and bonds | 20 19 | 595 486 251 12 094 233 938 | 828 667 924 11 569 691 329 | 592 202 816 12 094 233 938 | 828 667 924 11 569 691 329 |

75. Transitional provisions

Transitional provision for statutory receivables - GRAP 108

General information

The entity took advantage of the transitional provision as per Directive 13 of the GRAP Reporting Framework.

The municipality has taken advantage of the transitional- provision for the reporting year ended 30 June 2020. Therefore the municipality has not changed the accounting policies in respect of the classification and measurement all receivables within the ambit of statutory receivable.

The municipality has identified the following receivables which fall within the scope of GRAP.

- Property rates receivables receivables from exchange transactions
- Aarto debtors receivables from non-exchange

^{*} See Note 63

Consolidated Annual Financial Statements for the year ended 30 June 2020

Notes to the Consolidated Annual Financial Statements

Figures in Rand

Recovery of unauthorised, irregular, fruitless and wasteful expenditure Progress made The nature and amount of adjustments
recognised in the statement of changes in net assets during the period, are as follow

The municipality intends to comply with GRAP 108 in the next reporting period (30 June 2021). Position paper detailing the GRAP 108

requirements and process to be followed to ensure compliance with GRAP 108 will be developed. From the position paper, an accounting

policy will also be developed.

76. Investment in joint venture

Tshwane Automotive Hub Special Economic Zone

During the 2019/20 Financial Year- 06 June 2020, City of Tshwane represented by Tshwane Economic Development Agency entered into a tripartite agreement with Department of Trade, Industry and Competition (DTIC) and Gauteng Department of Economic Development (GDED) for a duration of five years in order to establish a Special economic Zone in a form of Tshwane Automotive Hub Special Economic Zone (TAHSEZ) to industrialize the capital city and mitigate unemployment rates provincially and surrounding Tshwane.

A Special Purpose Vehicle was established namely TAHSEZ, City of Tshwane holds 33.3% shareholding in the SPV, the DTIC 33.3% and GDED 33.4%. City of Tshwane represented by TEDA is the land owners.

This agreement is material in nature hence the disclosure, however there was no impact in the 2019- 2020

78. Jointly controlled operations

On the 5th of December 2015 City of Tshwane entered into an agreement with EON Reality Inc. to establish an Interactive Digital Centre Hub in the city. This agreement was for a three year period and could be renewed for a further 2 years pending the City of Tshwane's approval. Both parties, EON Reality Inc. and the City of Tshwane jointly control the Interactive Digital Centre Hub and the payment structure outlines that both the City of Tshwane and EON Reality Inc. contribute 50% each towards the acquiring of equipment and other resources and/or assets to establish the IDC Hub, however the ownership structure as per the agreements states that City of Tshwane owns 100% of Interactive Digital Centre Hub infrastructure. Contribution obligations were outlined as a cash contribution by the City of Tshwane of \$6 582 511 (R74 342 879, 23) and asset donations to the same value by EON Reality Inc.

The City of Tshwane paid an amount of R74 000 000 on 6 August 2015. Assets to the value of R64 460 021, 93 were verified to have been received at the Interactive Digital Centre Hub at Tshwane Leadership Management Academy on 4 April 2016 delivered by EON Reality Inc. whilst an amount of R2 377 073,71 was expensed.

A Debtor was raised to the amount of R7 162 904,36 owed by EON Reality Inc. pending the delivery of the remaining promised assets. Assets were capitalised at cost and depreciated accordingly at their respective useful lives. Depreciation for the year amounted to R61 671 583, 19 (2019: R15 080 302,35) and the carrying amount of Interactive Digital Centre Hub assets amounted to R4 019 324.69 for property, plant and equipment and R21 444 193, 49 (2019: R26 459 192,42) for intangible assets

Notes to the Consolidated Annual Financial Statements

Figures in Rand

2019/20

Refilwe Manor Bulk Infrastructure Vandalism

Makole Property Developments was appointed as a turnkey contractor responsible for the design, supervision and construction on the project. In November 2018, the construction was completed. The testing of the reservoir, and mechanical works of the pump stations (pump station 12 and 15) has been in progress to date however progress has been slow.

On the 21st of January 2020, a local subcontractor was deployed to site to finalise an audit of outstanding works at the pump stations. Upon arrival, they found that most of the work done has been vandalised

The estimated cost associated with damage and major items being stolen amounted to R 4 970 981.97

National Fund for Municipal Workers incident:

In August 2019, the payment of R53 million which was meant to pay the National Fund for Municipal Workers (NFMW) was fraudulently diverted to an unknown ABSA account. Banking details was fraudulently changed on a spreadsheet used to import bulk payments into ABSA system. The City became aware of the incident few days after payment date, where the fund contacted the City to find out about the outstanding payment. ABSA bank was contacted to investigate and to flag the account that received the payment. The funds were already withdrawn and only about 1% of the payment (R400k) was left in the account.

An investigation has been lodged with the Group Audit and Risk, Group ICT and South African Police Service (SAPS) to conduct investigations. SAPS has already tasked the HAWKS to investigate this case.

Theft of funds due to Cyber-criminal conduct that occurred in 2018/19

As at 31st March 2020, the City with the assistance of the bank managed to recover almost 80% of the transfer made as follows; An amount of R318 616.70 received in April 2019

An amount of R9 312 118.71 received in January 2020

An insurance claim has been submitted for possible loss of R2 496 227.10 i.e. the balance not yet recovered

2018/19

Theft and vandalism at Annlin reservoir

A contractor was appointed to complete the reservoir outstanding works on 23 December 2015 for the construction duration of 10 months. The contractor did not achieve completion by the required date and was therefore put on penalties from 1 February 2017 until practical completion on 25 May 2017. The contractor was unable to complete the snag list and therefore abandoned site, leaving the project at 96% completed stage. Vandalism then occurred at the main valve chamber of the project on 8 January 2018, as a result the contractor was terminated on 12 April 2018.

The estimated vandalism and theft amount disclosed of R5 553 136 is based on the bill of quantities related to the entire reservoir chamber. However, the final assessment conducted by the assessor (who was retained by the insurance company) determined the value of the damage to specific items in the valve chamber to be R535 993.75. The Acting City Manager has instructed the City internal Forensic Service to conduct an investigation into this matter, the actual amount of the loss incurred by the City will be confirmed by the outcome of the investigation process.

Theft and vandalism at Baviaansport waste water treatment works (WWTW)

Vandalism and theft occurred specifically on the projects assets at baviaansport WWTW from May 2015 until June 2016. Assets of the Baviaanspoort WWTW were also vandalised during this period. All the incidents were reported to the South African Police Services (SAPS) and the City's insurance and the incidents have SAPS.

The amount of R3 904 346 disclosed for theft and vandalism is an estimated figure and not actual, the matter is still under investigation and actual amount of the loss incurred by the City will be confirmed by the investigation process.

Theft of funds due to Cyber-criminal conduct

In December 2018, the City suffered an attack when effecting a payment of R12 million where the banking details were fraudulently diverted into an unknown bank account. This matter was referred to the City's internal Forensic department for investigation, the final investigation report has not been received. The matter was also reported to South Africa Police Services. The City with the assistance of the bank managed to recover almost 80% of the transfer made as follows;

An amount of R318 616.70 received in April 2019

An amount of R9 312 118.71 received in January 2020.

80. Other materials

Analysis of other materials

81. Disclosure on the impact of Covid-19

The City is aware of fiscal policies which were introduced by Government and there is none that has any bearing on the City's financial instruments. The SARB eased monetary policy through a cumulative repo rate reduction of 300 basis points. This move will reduce the City's cost of borrowing on existing and future loans. There are no new risks emanating from the recent actions of SARB

The City has not defaulted on any of its obligations and it has not modified financial assets. The City has not suffered any credit losses, all its financial instrument counterparties are financial institutions whose long term credit rating is at least AA

There are no new risks arising as in the City's financial instruments as a result of COVID-19. The risk associated with the City's financial instruments are disclosed in the financial statements

The City has entered into a PPP agreement for finance lease for fleet. The interest rate in the PPP agreement is linked to the prime rate. With the fiscal measures introduced by the government in response to the Covid 19 pandemic, the prime rate had an impact on the interest rates for the finance lease. The PPP agreement was implemented in 2016, hence the fluctuations in prime rate did not have a significant impact as a large portion of the interest rates has already been repaid.

Impact on Revenue (Services Charges)

Due to the closure of certain industries during the National Lockdown actual income relating to service charges were 10.70% less than the projected revenue, with the highest impact on electricity charges.

| Budget | Actual | Column heading | Variance | | |

Payment Level There has been a significant decrease in the level of payment during the 4th quarter. All business partner categories recorded lower payments between April 2020 and June 2020.

| Quarter 3 | Quarter 4 | Variance | %Variance |
|------------------|------------------|------------------|-----------|
| 6,667,299,362.57 | 5,035,232,957.50 | 1,632,066,405.07 | -24.48% |

Debtors Book

The year-on-year growth in the debtor's book is 36.52%. This is the highest year-on-year increase in the last 5 years.

Debt Impairment

The repayment probabilities for the various risk categories were adjusted based on the most recent payment behaviors which resulted in an increase of R3. 324 billion in impairments.
